FIFTIETH
DETAILED ANNUAL REPORT
OF THE
REGISTRAR-GENERAL
OF
BIRTHS, DEATHS, AND MARRIAGES
IN
SCOTLAND.

[ABSTRACTS OF 1904.]

Presented to both Houses of Parliament by Command of His Majesty.

GLASGOW:
PRINTED FOR HIS MAJESTY'S STATIONERY OFFICE
By JAMES HEDDERWICK & SONS LIMITED,
At the "CITIZEN" PRESS, ST. VINCENT PLACE.

And to be purchased, either directly or through any Bookseller, from
OLIVER & BOYD, EDINBURGH; or
WYMAN & SONS, LTD., FETTER LANE, E.C., and
32 ABINGDON STREET, WESTMINSTER, S.W.; or
E. PONSONBY, 116 GRAFTON STREET, DUBLIN.

1906.

REPORT.

TO THE RIGHT HONOURABLE
JOHN SINCLAIR, M.P.,

His Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, &c.,
EDINBURGH, 2nd October, 1906.

SIR,

I HAD the honour in 1905, in conformity with the requirements of the seventh section of the Scottish Registration Act, 17 and 18 Vict., cap. 80, to transmit to your predecessor in office, the Most Honourable the Marquess of Linlithgow, K.T., as His Majesty's Secretary for Scotland, General Abstracts of the Births, Deaths, and Marriages registered in Scotland during the year 1904, along with the usual Explanation and Commentary.

At the same time my Fortieth Annual Report on Vaccination was transmitted, in accordance with the nineteenth section of the Scottish Vaccination Act, 26 and 27 Vict., cap. 108.

I have now the honour to transmit the Detailed Annual Report, together with the relative Tables, regarding the Births, Deaths, and Marriages registered in Scotland during the same year (1904).

I have the honour to be,

SIR,

Your most obedient Servant,

STAIR AGNEW,

Registrar-General.

REPORT TO THE REGISTRAR-GENERAL,

BY JAMES CRAUFURD DUNLOP, M.D., F.R.C.P. (EDIN.).

SIR,

I have the honour to submit the Detailed Report regarding the Births, Deaths, and Marriages registered in Scotland during the year ending 31st December 1904.

As this Report is the Fiftieth Detailed Annual Report issued by this Office, I take the opportunity of issuing a short supplement indicating some changes observed during the half-century that has elapsed since the foundation of this Office, since a national system of the registration of births, deaths, and marriages was instituted in Scotland. In a recent Decennial Supplement [Cd. 2790] I dealt at some length, and among other matter, with the death-rates from selected causes of death. In this supplement I omit that and confine my attention to other matters, and more especially to changes of the national birth, death, and marriage rates, to the changes of condition of education as observed in the marriage registers, and to the influence of the various clerical denominations, also as observed in the marriage registers.

POPULATION.

The population of Scotland as enumerated on the Census day 1901 was 4,472,103—of whom 2,173,755 were males and 2,298,348 females. The population at the previous Census, 1891, was 4,025,647—of whom 1,942,717 were males and 2,082,930 females. A comparison of the population at these two dates shows that the male population was

TABLE I.—Population of Scotland, in its Five Groups of Districts, by the Censuses of 1891 and 1901, and estimated to the middle of 1904.

FIVE GROUPS OF DISTRICTS.	CENSUS 1891.			CENSUS 1901.			Estimated to 30th June 1904.		
	Males.	Females.	Both Sexes.	Males.	Females.	Both Sexes.	Males.	Females.	Both Sexes.
Principal Town	800,032	872,732	1,672,764	942,139	1,014,422	1,956,561	994,877	1,066,419	2,061,296
Large Town	245,476	261,317	506,793	283,095	295,799	578,894	295,052	306,513	601,565
Small Town	380,744	408,578	789,322	437,571	459,309	896,880	455,592	475,001	930,593
Mainland-Rural	458,815	474,560	933,375	455,898	467,201	923,099	454,853	464,784	919,637
Insular-Rural	57,650	65,743	123,393	55,052	61,617	116,669	54,233	60,332	114,565
SCOTLAND.	1,942,717	2,082,930	4,025,647	2,173,755	2,298,348	4,472,103	2,254,607	2,373,049	4,627,656

increasing at the rate of 1·130 per cent. per annum, and the female population at the rate of 0·989 per cent. per annum. Assuming that those rates of increase continued, it is estimated that the population of Scotland at the middle of the year now under consideration, 1904, amounted to 4,627,656, of whom 2,254,607 were males and 2,373,049 females.

The population is for the purposes of these Reports divided into five groups of Registration Districts. The Principal Town Registration Districts contain the population of all towns which had on the last Census day a population of over 30,000; the estimated population of those districts was for 1904, the year now under review, 2,061,296, of whom 994,877 were males and 1,066,419 females. The Large Town Districts include the population of all towns having on the day of the last Census a population of between 10,000 and 30,000; the estimated population for 1904 was 601,565—of whom 295,052 were males and 306,513 females. The Small Town Districts contain the population of all towns which on the day of the last Census contained a population of between 2000 and 10,000; the population of them for the year 1904 is estimated to be 930,593, of whom 455,592 were males and 475,001 females. The Mainland-Rural Districts comprise all the mainland registration districts which are not included in the above urban districts; the population of them for 1904 is estimated to be 919,637, of whom 454,853 were males and 464,784 females. The Insular-Rural Districts include the population of the insular portions of Scotland other than included in the above urban districts; the population of them for the year 1904 is estimated to be 114,565, of whom 54,233 were males and 60,332 females.

The estimated population of the counties of Scotland and of the divisions of the counties may be seen in Table 5, and that of each of the principal towns in Table 4.

The estimated population for 1904 is 48,433 more than the estimated population for 1903. The recorded excess of births over deaths amounts to 54,622. The difference between these two figures may be taken as indicating the probable effect of emigration and immigration during the year.

BIRTHS.

*Table 1.** During the year 1904 the births of 132,603 living children were registered in Scotland. These births are 922 fewer than those registered during the previous year, but are more than the births registered in any other past year, and are 2614 more than the average number registered annually during the last ten years.

The birth-rate per thousand of the estimated population is found to be 28·65, a rate which is the lowest recorded for Scotland in the annual reports of this Office. It is 0·51 less than that of the previous year, 1903, which is the smallest birth-rate previously recorded, and is 1·11 less than the average of the rates recorded during the previous ten years. This is the first year in which the national birth-rate has fallen below 29 per thousand.

Tables 2 and 3. Births registered in the Principal Town Districts numbered 60,788, and the birth-rate in them for the year was 29·49 per thousand; births in the Large Town Districts numbered 18,610, and the birth-rate in them was 30·94; births in the Small Town Districts numbered 27,320, and the birth-

* The References in the margin are to the Appendix Tables.

rate in them was 29·36; births in the Mainland-Rural Districts numbered 23,450, and the birth-rate in them was 25·50; births in the Insular-Rural Districts numbered 2435, and the birth-rate in them was 21·25. The numbers of births in these groups of registration districts are, with the exception of those registered in the Small Town Districts, each less than in the previous year. In the Principal Town Districts the births numbered 1218 fewer than in that year; in the Large Town Districts they numbered 13 fewer; in the Mainland-Rural Districts 21 fewer; in the Insular-Rural Districts 57 fewer; while those in the Small Town Districts numbered 387 more. The birth-rate in the Principal Town Districts was 1·08 lower than in 1903; in the Large Town Districts it was 0·37 lower; in the Insular-Rural Districts it was 0·38 lower; while in the Mainland-Rural Districts it was the same as in that year; and in the Small Town Districts it was 0·10 more than in that year. These comparisons show that the decline of the birth-rate is mostly due to a decline of the rate in the Principal Town Districts.

The birth-rates of the divisions of the counties for the year ranged from 32·20 in the South-Western to 20·62 in the Northern; in the North-Eastern it was 28·03, in the West-Midland 27·92, in the South-Eastern 26·34, in the East-Midland 25·83, in the Southern 23·32, and in the North-Western 22·31. In each of these divisions the rate is less than what it was in 1903, with the exception of that in the North-Western, where the rate is slightly higher than in that year. *Table 5.*

The birth-rates of the counties ranged from 36·09 in Linlithgow, 33·24 in Lanark, 31·24 in Stirling, and 31·12 in Ayr, to 17·98 in Orkney, 18·54 in Shetland, 19·26 in Sutherland, 19·79 in Argyll, and 19·94 in Bute. In five counties the rate exceeded 30 per thousand, in twelve counties it was between 25 and 30 per thousand, in eleven counties between 20 and 25 per thousand, and in five counties it was less than 20 per thousand.

The birth-rates of the principal towns ranged from 38·90 in Hamilton, 36·15 in Coatbridge, and 34·93 in Motherwell, to 23·41 in Edinburgh, 23·93 in Perth, and 26·82 in Kirkcaldy. In seven of these towns the rate exceeded 30 per thousand, in six the rate was between 25 and 30, while in two it was less than 25 per thousand. With the exceptions of the rate of *Table 4.*

TABLE II.—Birth-rate in Scotland and in its Groups of Registration Districts in 1904.

DISTRICTS.	Estimated Number of Women aged 15-45.	Births.	Birth-rate per 1000 of Population.		Birth-rate per 1000 Women aged 15-45.	
			Rate.	Relative Quantity, Scotland being=100.	Rate.	Relative Quantity, Scotland being=100.
SCOTLAND .	1,117,666	132,603	28·65	100	118·6	100
Principal Town	533,787	60,788	29·49	102·9	113·9	96·0
Large Town	143,466	18,610	30·94	108·0	129·7	109·4
Small Town	215,738	27,320	29·36	102·5	126·6	106·7
Mainland-Rural	199,885	23,450	25·50	89·0	117·3	98·9
Insular-Rural	24,790	2,435	21·25	74·2	98·2	82·8

Greenock and Hamilton, those of all these towns are less than what they were in the previous year.

When the number of births registered during the year is compared with the estimated number of women of child-bearing age, it is found that the birth-rate per thousand of such women amounts to 118·6, a rate which is 2·0 less than that of the previous year. This rate in the Principal Town Districts was 113·9, in the Large Town Districts 129·7, in the Small Town Districts 126·6, in the Mainland-Rural Districts 117·3, and in the Insular-Rural Districts, 98·2. Compared to the corresponding rate of the previous year, that of the Principal Town Districts is 4·2 less, of the Large Town Districts 1·1 less, of the Small Town Districts 0·9 more, of the Insular-Rural Districts 1·7 less, while that of the Mainland-Rural Districts is similar.

Of the total living children born, 67,794 were males and 64,809 females, the proportion being 104·6 males to each 100 females, a proportion of males rather greater than recorded in the previous year. The birth-rate of males per thousand of the male population amounted to 30·07, and of females per thousand of the female population 27·31; the former is 0·47 less than the corresponding rate of the previous year, and the latter 0·54 less than that rate.

Table 1. Of the total births, 9010, or 6·79 per cent., were illegitimate. Both the total number of illegitimate births and the proportion of the total births to be illegitimate are higher than what they were in any year since 1897. Illegitimate births are 715 more than in the previous year, and the proportion of the total births to be illegitimate 0·58 more than in that year. This increase of the illegitimate rate amounts to 9·3 per cent. of the rate of the previous year. The illegitimate rate has, since the founding of this Office, been a diminishing quantity, and, with few exceptions, been smaller in each year than what it was in the previous year; and on no occasion since 1856, which was the second year of national registration, has an increase of the illegitimate rate of like amount been recorded.

Table 5. In the Principal Town Districts the illegitimate births numbered 4100, the illegitimate rate was 6·74; in the Large Town Districts the illegitimate births numbered 996, and the rate was 5·35; in the Small Town Districts these births numbered 1664, and the rate was 6·09; in the Mainland-Rural Districts the illegitimate births numbered 2123, and the rate was 9·05; in the Insular-Rural Districts these births numbered 127, and the rate was 5·22. The rate in each of these groups of districts, Insular-Rural excepted,

TABLE III.—Births, 1904. Number of Legitimate, Illegitimate, and Total Births in Scotland, and its Five Groups of Districts, distinguishing the Sexes; also the number of Twin and Triplet Births.

FIVE GROUPS OF DISTRICTS.	TOTAL BIRTHS.			Legitimate Births.			Illegitimate Births.			Twin Births.	Triplet Births.
	Males.	Fem.	Both Sexes.	Males.	Fem.	Both Sexes.	Males.	Fem.	Both Sexes.		
Principal Town	30953	29835	60788	28836	27852	56688	2117	1983	4100	731	9
Large Town	9500	9110	18610	9028	8586	17614	472	524	996	221	4
Small Town	13994	13326	27320	13152	12504	25656	842	822	1664	329	2
Mainland-Rural	12085	11365	23450	10973	10354	21327	1112	1011	2123	292	3
Insular-Rural	1262	1173	2435	1197	1111	2308	65	62	127	30	-
SCOTLAND . .	67794	64809	132603	63186	60407	123593	4608	4402	9010	1603	18

was higher than in 1903; in the Principal Town Districts it was 11·0 per cent. higher, in the Large Town Districts it was 14·1 per cent. higher, in the Small Town Districts 6·8 per cent. higher, in the Mainland-Rural Districts 7·0 per cent. higher, while in the Insular-Rural Districts it was 4·4 per cent. lower. The number of illegitimate births in each of these groups of districts, the Insular-Rural Districts excepted, was also greater than in the previous year. In the Principal Town Districts it was 334, or 8·8 per cent., more; in the Large Town Districts it was 122, or 14·0 per cent., more; in the Small Town Districts it was 130, or 8·5 per cent., more; in the Mainland-Rural Districts it was 138, or 7·0 per cent., more; while in the Insular-Rural Districts it was 9, or 6·6 per cent., less. These comparisons show that, with the exception of the small Insular-Rural Districts, the increased amount of illegitimacy recorded was not restricted to any one group of registration districts, but was general to all, both to the urban and to the rural groups, and to each of the urban groups.

In the counties the illegitimate rate ranged from 14·39 in Elgin, 14·14 in Wigtown, 12·33 in Banff, 11·49 in Dumfries, and 11·23 in Aberdeen and Berwick, to 3·90 in Dumbarton, 3·95 in Ross and Cromarty, 4·55 in Orkney and Fife, and 4·57 in Renfrew. In 7 counties the rate was less than 5 per cent., in 16 it was between 5 and 10 per cent., while in 10 counties it exceeded 10 per cent. Compared to the returns of the previous year, an increased illegitimate rate is found in 22 counties and a diminished rate in 11 counties. In 23 counties the number of illegitimate births is greater than in the previous year, in 1 county the number is the same, while in 9 counties it is less. The largest increases of the illegitimate rate are in Nairn, Shetland, Selkirk, Caithness, Sutherland, Argyll, Renfrew, and Wigtown. The largest decreases of the rate are in Orkney and Roxburgh.

The illegitimate rate in the principal towns ranged from 9·03 in Dundee, 8·52 in Aberdeen, and 8·48 in Edinburgh, to 3·00 in Coatbridge, 3·38 in Motherwell, and 3·86 in Kirkcaldy. In five of these towns the rate was less than 5 per cent., while in ten of them it was more than 5 per cent.; in twelve of them the rate was higher than in 1903, in three it was lower than in that year; the greatest increase of rate occurred in Kilmarnock, Perth, and Leith, and the greatest decrease in Kirkcaldy.

The legitimate birth-rate per thousand married women of child-bearing

TABLE IV.—Births, 1904. Birth-rate per 1000 of Population; Percentage of Illegitimate to the Total Births; Proportion of Males to Females in the Legitimate, Illegitimate, and Total Births; and Proportion of Mothers who bore Twins and Triplets; in Scotland, and its Five Groups of Districts, in 1904.

FIVE GROUPS OF DISTRICTS.	Births per 1000 of Population.	Per- centage of Illegit. to Total Births.	Proportion of Males to every 100 Females in the			Proportion of MOTHERS who bore TWINS. — One in every	Proportion of MOTHERS who bore TRIPLETS. — One in every

age was 263·3, a rate which is 6·1 less than that of the previous year. In the divisions of the counties this rate ranged from 282·1 in the North-Western and 274·3 in the West-Midland to 238·7 in the South-Eastern and 242·2 in the Southern. In the counties this rate ranged from 314·9 in Linlithgow, 314·1 in Caithness, 295·7 in Nairn, 290·0 in Ross and Cromarty, and 285·4 in Ayr, to 218·0 in Berwick, 218·4 in Selkirk, 227·2 in Roxburgh, and 227·6 in Edinburgh. In the principal towns this rate ranges from 317·1 in Hamilton, 302·8 in Coatbridge, and 270·7 in Govan, to 208·6 in Edinburgh, and 231·8 in Perth.

The illegitimate birth-rate per thousand unmarried and widowed women of child-bearing age was 13·9, a rate which is 1·0 more than that of 1903. This rate ranged from 22·9 in the North-Eastern Division of the counties and 16·4 in the Southern Division, to 8·5 in the North-Western and 11·0 in the West-Midland. In the counties this rate ranged from 25·5 in Banff, 24·6 in Elgin, 23·4 in Wigtown, and 22·9 in Aberdeen, to 5·4 in Shetland, 6·0 in Orkney, 6·3 in Ross and Cromarty, and 8·2 in Sutherland. In the principal towns this rate ranged from 22·3 in Hamilton, 16·9 in Aberdeen, 15·4 in Motherwell, and 15·1 in Glasgow, to 7·0 in Kirkcaldy, 9·4 in Paisley, and 10·9 in Edinburgh.

Twin births of living children registered during the year numbered 1603, and triplet births of living children 18. The former is 1 fewer than in the previous year, but the latter is 5 more. Of the total births of the year 1 in every 82 was a birth of twins, and 1 in every 7276 a birth of triplets; of the total living children born during the year 1 in every 41 was a twin, and 1 in every 2456 a triplet. The proportion of the total births to be births of twins and births of triplets is in both cases slightly higher than in the previous year.

Table 45. The average number of births registered daily throughout the year was 362. This daily average varied from 391 in July to 336 in November. In May it was 384, in April 381, in March 373, in August 366, in February 363, in July 360, in October 350, in September 349, in January 348, and in December 345.

The birth-rate of the year in the United Kingdom was 27·5, in England and Wales 27·9, and in Ireland 23·6. The birth-rate of the year in Scotland was thus 1·2 more than that of the United Kingdom, 0·8 more than that of England, and 5·1 more than that of Ireland.

The following are the birth-rates for the year 1904 in some European countries:—Roumania 40·1, Servia 39·8, Hungary 37·0, Prussia 34·7, Spain 34·4, Italy 32·6, Holland 31·4, Denmark 28·9, Norway 28·2, Switzerland 27·7, Belgium 27·6, Sweden 25·8, France, 20·9.

MARRIAGES.

Table 1. Marriages registered in Scotland during the year 1904 numbered 32,271, a number which is 80 fewer than in 1903, but 1218 more than the average number registered annually during the previous ten years. The marriage-rate for the year was 6·97 per thousand of the estimated population, a rate which is 0·09 less than that for the previous year, and 0·13 less than the mean of the rates for the previous ten years.

Tables 2 and 3. Marriages registered in the Principal Town Districts numbered 16,891, and the marriage-rate in those districts was 8·19; this number of marriages is 345 fewer than in the previous year, and this rate 0·31 less than in that

year. In the Large Town Districts marriages numbered 4269, and the rate was 7·10 per thousand; this number is 41 fewer than in the previous year, and this rate 0·15 less than in that year. Marriages in the Small Town Districts numbered 6067, and the rate was 6·52; this number is 249 more than in the previous year, and this rate is 0·20 higher. Marriages registered in the Mainland-Rural Districts numbered 4640, and the rate in them was 5·05; this number is 23 more than in the previous year, and the rate is 0·03 higher than in that year. Marriages registered in the Insular-Rural Districts numbered 404, while the rate in them was 3·53; this number is 34 more than in the previous year, and this rate 0·32 higher than in that year.

In the divisions of the counties the marriage-rate ranged from 7·54 in Table 5. the South-Western to 4·35 in the North-Western; in the South-Eastern it was 7·44, in the North-Eastern 6·70, in the Southern 6·70, in the East-Midland 6·67, in the West-Midland 5·85, and in the Northern 5·01. In the North-Eastern, South-Western, and South-Eastern Divisions the marriage-rate was lower than in the previous year, in the remaining five divisions it was higher than in that year.

In the counties the marriage-rate ranged from 7·93 in Lanark, 7·91 in Edinburgh, 7·61 in Aberdeen, and 7·17 in Clackmannan, to 2·91 in Sutherland, 3·86 in Ross and Cromarty, 3·97 in Bute, and 4·06 in Argyll. In 3 counties the marriage-rate was less than four per thousand, in 7 it was between four and five per thousand, in 5 it was between five and six per thousand, in 13 it was between six and seven per thousand, and in 5 over seven per thousand.

In the principal towns the marriage-rate for the year ranged from 9·23 Table 4. in Perth, 9·15 in Aberdeen, 8·99 in Glasgow, and 8·70 in Edinburgh, to 5·31 in Govan, 5·87 in Motherwell, 6·27 in Kirkcaldy, and 6·52 in Leith. In 2 of these towns the rate was between five and six per thousand, in 5 it was between six and seven per thousand, in 3 between seven and eight per thousand, in 3 between eight and nine per thousand, and in 2 it was more than nine per thousand.

Of the men marrying during the year 91·3 per cent. were bachelors, and Table 15. 8·7 per cent. widowers. Of women marrying during the year 95·2 per

TABLE V.—Marriages, 1904. Number of Marriages contracted in Scotland and its Five Groups of Districts according to the Rites of the several Religious Denominations, and their Proportion to the Total Marriages in each Group.

Table 14. cent. were spinsters, and 4·8 per cent. widows. In 28,649 instances the marriages were between bachelors and spinsters; in 794, between bachelors and widows; in 2055, between widowers and spinsters; and in 752, between widowers and widows. Marriages between bachelors and spinsters amounted to 88·84 per cent. of the total; those of bachelors and widows to 2·46 per cent. of the total; those of widowers and spinsters to 6·37 per cent.; and those of widowers and widows to 2·33 per cent. Compared to the marriages of the previous year, those of bachelors with spinsters and of widowers with spinsters are both more, while those of bachelors with widows and of widowers with widows are both fewer.

In this Report an addition has been made to the usual tabular statements regarding the ages of persons married during the year. This addition consists of the Tables given on pages 25-29. These Tables have been constructed to show the ages of men and women married, and the ages of women married by men of particular age-groups, of men married by women of particular age-groups, and similar information regarding bachelors married, widowers married, spinsters married, and widows married.

The average age of all the men married during the year was 28·9 years, and of all the women married 26·5. In the Principal Town Districts the average age of men married was 29·1, and of women 26·3; in the Large Town Districts the average age of the men was 28·2, and of the women 25·7; in the Small Town Districts the average age of the men was 28·3, and of the women 25·7; in the Mainland-Rural Districts the average age of the men was 29·1, and of the women 26·3; in the Insular-Rural Districts the average age of the men was 33·0, and of the women 28·7. These averages were lowest in the Small Town Districts, and highest in the Insular-Rural Districts.

Tables 11 and 16. Of the 32,271 husbands, 1937, or 6·00 per cent., were under 21 years of age; 9391, or 29·10 per cent., were between 21 and 25; and 20,943, or 64·90 per cent., were over 25 years old. The youngest husbands of the year were two aged 16; these were both bachelors, and married spinsters of 16 and 18. The youngest widowers married during the year were one aged 19, and two aged 20; these married spinsters aged from 17 to 25. Bachelors of over 60 who married during the year numbered twenty-seven, the oldest of them being over 80; of them, nineteen married spinsters aged from 21 to 70, and eight married widows from 40 to 65. Of widowers marrying during the year, 193 were aged more than 60; of them, 127 married spinsters aged from 19 to 60, and 66 married widows aged from 25 to 75.

Of the 32,271 wives married during the year, 31,624, or 98 per cent., were of child-bearing age (15 to 45), while 645, or 2 per cent., were over that age. 5922, or 18·25 per cent., of the women married, were under 21 years old; 11,269, or 34·92 per cent., were between 21 and 25; while 15,080, or 46·73 per cent., were more than 25 years old. The youngest wives of the year were seven aged 15, and 53 aged 16; these were all spinsters, and married bachelors aged from 16 to 40. The youngest widows married were one aged 18, and one aged 19; these both married bachelors of 19. Spinsters of over 60 who married numbered 9; of them, two married bachelors of between 60 and 70, and seven married widowers of between 60 and 70. Widows who married when over 60 numbered 29; of them, seven married bachelors of between 60 and 70, and twenty-two widowers of between 50 and 75.

The new Tables show that in several instances there were wide differences

of age between husbands and wives. Thus, one widow of between 30 and 35 married a youth of 18; another widow of the same age married a young man of 20; and a widow of between 40 and 45 also married a young man of 20. Six bachelors of over 40 married spinsters of under 20; and six widowers of similar age also married spinsters of less than 20—of the latter, one married a girl of 17, and one, whose age was over 60, married a girl of 19; two bachelors of over 60 married women of under 30, and seven widowers of that age also married women of under 30, one marrying a girl of 19; and two widowers of over 75 married women of between 20 and 30.

When the marriages of this year are compared with the total marriages in Scotland since national registration was founded, it is found that the proportion of men to be under 25 is less, to be between 25 and 40 more, and to be over 40 less; and that the proportion of women married in similar age periods are similarly changed, for the proportion of the brides of the year to be under 25 and over 45 are found to be less than those proportions of the total marriages since 1855, while the proportion to be between 25 and 40 is larger. *Tables 12 and 13.*

Of the 32,271 marriages registered during the year, 30,409, or 94·23 per cent., were celebrated according to the rites of religious denominations, while 1862, or 5·77 per cent., were irregular marriages. The latter are fewer than those of any year since 1899, and the proportion they form of the total marriages is also smaller than in any year since 1899. *Table 10.*

Of the marriages in Scotland registered during the year, 14,803, or 45·87 per cent., were contracted according to the rites of the Established Church. This is the largest number of marriages in the Established Church recorded in these reports, it is 111 more than in the previous year, and 787 more than the average number of the last ten years. These marriages amount to 45·87 per cent. of the total, the highest proportion in any year since 1888, and one which is 0·45 more than that of the previous year, and 0·72 more than the mean of the proportions of the last ten years. The proportion of the total marriages contracted according to the rites of the Established Church ranged from 67·65 per cent. in the Mainland-Rural Districts, to 37·81 per cent. in the Principal Town Districts. In the Small Town Districts it was 50·55, in the Insular-Rural Districts 48·02, and in the Large Town Districts 47·22. In the counties this rate ranged from 75·20 in Kirkeudbright, 71·23 in Kincardine, 68·85 in Wigtown, and 68·23 in Peebles, to 29·03 in Sutherland, 30·14 in Ross and Cromarty, and 36·88 in Lanark. In the principal towns this rate ranged from 50·67 in Leith, and 50·44 in Kirkcaldy, to 23·86 in Coatbridge, and 33·49 in Dundee. *Tables 8, 9, and 10.*

Marriages according to the rites of the United Free Church numbered 8776, and constituted 27·19 per cent. of the total. These marriages are 2 fewer than those of the previous year, but the rate is 0·06 more. Compared to the average annual marriages of the United Free Church, or of the Free Church and the United Presbyterian Church before the union, these marriages are 199 fewer and the rate 1·72 less. United Free Church marriages were relatively most numerous in the Insular-Rural Districts, 35·64 per cent., and relatively fewest in the Large Town Districts, 24·50. In the Small Town Districts they constituted 30·89 per cent. of the total, in the Principal Town Districts 27·00 per cent., and in the Mainland-Rural Districts 24·83 per cent. In the counties this rate ranged from 45·34 in Orkney, and 45·16 in Sutherland, to 17·92 in Kincardine, and 21·26 in Kirkeudbright. In the principal towns this

rate ranged from 34·82 in Perth, and 34·78 in Kirkcaldy, to 22·99 in Govan, and 23·02 in Greenock.

Marriages according to the rites of the Roman Catholic Church numbered 3328, and constituted 10·31 per cent. of the total. These marriages are 159 fewer than those of the previous year, but are 196 more than the average number registered during the previous ten years; the rate is 0·47 less than that of the previous year, but 0·23 more than the mean of the rates of the past ten years. Roman Catholic marriages were relatively most numerous in the Large Town Districts, 13·17 per cent., and relatively fewest in the Mainland-Rural Districts, 2·97 per cent. In five counties no Roman Catholic marriages were registered during the year. The counties in which there was the highest proportion of Roman Catholic marriages were Dumbarton 17·94 per cent., Renfrew 17·71 per cent., and Lanark 17·29 per cent. In the principal towns this rate ranged from 34·09 in Partick, and 22·22 in Greenock, to 2·26 in Aberdeen, and 4·36 in Edinburgh.

Episcopalian marriages registered during the year numbered 925, and constituted 2·87 per cent. of the total. This number is 49 more than in the previous year, but 8 fewer than the average number registered during the last ten years. This rate is 0·16 more than that of the previous year, but 0·15 less than the mean of the rates of the past ten years. The rate for the year was highest in the Principal Town Districts, 3·87, and lowest in the Insular-Rural Districts, 0·50. In four counties no Episcopalian marriages were registered during the year, in Kincardine they amounted to 8·49 per cent. of the total, and in Forfar to 6·87 per cent. In the principal towns this rate ranged from 8·94 in Dundee and 6·58 in Edinburgh, to 0·82 in Hamilton and 1·30 in Partick.

Irregular marriages registered during the year numbered 1862, and constituted 5·77 per cent. of the total. This number is 64 fewer than in the previous year, but 194 more than the average number registered annually during the last ten years. The rate is 0·18 less than that of the previous year, but 0·43 more than the mean of the rates of the last ten years. Of these marriages, 1748 were contracted in the Principal Town Districts, where they constituted 10·35 per cent. of the total, 82 were in the Large Town Districts, 27 in the Small Town Districts, 4 in the Mainland-Rural Districts, and 1 in the Insular-Rural Districts. These marriages constituted 20·87 per cent. of the total marriages registered in the town of Edinburgh, 15·28 per cent. of those registered in the county of Edinburgh, and 11·84 per cent. of those in Glasgow. In ten counties and in one principal town no irregular marriages were registered.

In the Principal Town Registration Districts, 64·81 per cent. of the marriages were in one or other of the great Presbyterian Churches; in the Large Town Districts that proportion was 71·72, in the Small Town Districts 81·44, in the Mainland-Rural Districts 92·48, and in the Insular-Rural Districts 83·66; and in Scotland generally, 73·06.

Of the 32,271 men married during the year, 31,717 signed the register by writing, while 554, or 1·72 per cent., could not do so but used the "mark." Of the women, 31,529 signed by writing, and 742, or 2·30 per cent., by the "mark." Men who were married during the year and who were unable to write numbered 10 fewer than in the preceding year, and 100 fewer than the average number during the previous ten years; the percentage these men formed of the total was 0·02 less than in the previous year, and 0·40 less than the mean of the percentages of the last ten years.

The number of these women was 2 fewer than in the previous year, and 231 fewer than the average number during the last ten years; the percentage they formed of the total married was the same as in the previous year, but 0·89 less than the mean of those percentages during the last ten years.

Men using the "mark" for the signing of the marriage registers in the Principal Town Districts numbered 312, or 1·85 per cent. of the total married, while women using the "mark" numbered 425, or 2·52 per cent. of the total; these numbers and percentages are all higher than in the previous year. In the Large Town Districts, men using the "mark" numbered 62, or 1·45 per cent. of the total, and women using the "mark" 85, or 1·99 per cent. of the total; the number and percentage of these men are smaller than in the previous year, but the number of these women and the percentage of them are greater than in that year. In the Small Town Districts, men using the "mark" numbered 129, and constituted 2·13 per cent. of the total, and women doing so numbered 161, and constituted 2·65 per cent.; all these numbers and percentages are less than in the previous year. In the Mainland-Rural Districts these men numbered 32, and were 0·69 per cent. of the total, while the women numbered 42 and formed 0·91 per cent. of the total; these numbers and rates are all somewhat larger than in the previous year. In the Insular-Rural Districts, men using the "mark" numbered 19, or 4·70 per cent. of the total, and women using the "mark" 29, or 7·18 per cent. of the total; all these numbers and percentages are more than in the previous year.

In the divisions of the counties the percentage of men married who used the "mark" ranged from 4·54 in the North-Western and 2·64 in the South-Western, to 0·29 in the North-Eastern and 0·55 in the Southern; and the percentage of women using the "mark" ranged from 7·52 in the North-Western and 3·35 in the South-Western, to 0·86 in the North-Eastern and 0·90 in the Northern. In the counties the percentage of men using the "mark" ranged from 6·05 in Inverness, 3·23 in Sutherland, and 3·06 in Lanark, to 0 in seven counties. The percentages of such women ranged from 9·93 in Ross and Cromarty, 9·30 in Nairn, 5·81 in Inverness, and 3·87 in Lanark, to 0 in six counties. In Bute, Berwick, Selkirk, and Kirkcudbright every man and woman married during the year was able to sign the register by writing.

To get some insight into the class of person using the "mark" in Scotland, a further tabulation of them has this year been prepared, and may be seen in Tables A, B, C, and D.

Of the 1296 persons who used the "mark," 608, or 46·91 per cent., were married in the Roman Catholic Church; 323, or 24·9 per cent., were married in the Established Church; 123, or 9·5 per cent., in the United Free Church; 88, or 6·8 per cent., were married irregularly; 64, or 4·94 per cent., were married in the Jewish Church; 23, or 1·8 per cent., in the Episcopal Church; and 67, or 5·2 per cent., were married in churches of other denominations. The most striking feature of these figures is the relatively large number married in the Roman Catholic Church; this fact is well shown in the following Table, where the percentage of the total married in each Church is compared to the percentage of the illiterates married in them; in that Table the large excess of illiterates in the Roman Catholic Church is very evident. In the same Table it may also be seen that of persons married in the Roman Catholic Church 91·3 per thousand were illiterate, of those married in the churches of "other denominations" 25·4

per thousand were illiterate, of those married irregularly 23·6 per thousand were illiterate, of those married in the Episcopal Church 12·4 per thousand were illiterate, of those married in the Established Church 10·9 per thousand were illiterate, and of those married in the United Free Church 7·0 per thousand were illiterate.

TABLE A.—Showing Persons and Illiterates Married in the various Churches during the Year 1904.

CHURCH, &c.	PERSONS MARRIED.		ILLITERATES MARRIED.		Illiterates per thousand Married.
	Number.	Per cent. of total Married.	Number.	Per cent. of total Illiterates.	
Established Church, . .	29,606	45·9	323	24·9	10·9
United Free Church, . .	17,552	27·2	123	9·5	7·0
Roman Catholic Church, . .	6,656	10·3	608	48·9	91·3
Episcopalian Church, . .	1,850	2·8	23	1·8	12·4
Jewish Church, . .	5,154	8·0	64	4·9	25·4
Other Denominations, .			67	5·2	
Irregular Marriages, . .	3,724	5·8	88	6·8	23·6

The ages of the illiterates are tabulated in Table B and compared to the ages of the total persons married during the year. In that Table the most evident fact is the older age of the illiterates married than of all persons married. This is so both in the case of males and in that of females. In both sexes the percentages married under 35 are less than the corresponding percentages of all males, and in both sexes the proportion of illiterates married at ages over 35 is greater than the corresponding proportions of all males and females married.

TABLE B.—Showing Ages of Illiterates Married and of all Persons Married.

AGE PERIODS.	MALES.				FEMALES.			
	Total.		Illiterates.		Total.		Illiterates.

The age distribution of the illiterates married during the year is

further studied in Table C. In it the age distribution of the illiterates of each clerical denomination is compared with that of all persons married during the year. In this Table the sexes are considered conjointly. In this Table it is evident that of those married in the Established Church, in the United Free Church, in churches of "other denominations," and of those married irregularly, the proportions married at earlier ages are smaller than the corresponding proportions of all married, and the proportions married over 45 larger than are the proportions of all persons married. Among the Roman Catholics and Episcopalians these differences are less marked, while Jewish marriages do not show them. These conclusions point to the existence of a larger proportion of younger illiterates among the Roman Catholics, Episcopalians, and Jews than among those of other denominations.

TABLE C.—Showing the Age Distribution of all Persons Married during the Year and of Illiterates in each of the Churches.

AGE PERIODS.	AGE DISTRIBUTION PER HUNDRED OF							
	All Persons Married.	ILLITERATES MARRIED IN THE VARIOUS DENOMINATIONS.						
		Established Church.	United Free Church.	Roman Catholic Church.	Episcopal Church.	Jews.	Other Churches.	Irregular Marriages.

55 and over .	0.9	7.1	7.3	3.4	7.5	6.8

The occupations of the male illiterates of the year are shown in Table D. In that Table, in addition to the number of illiterates in each group of occupations, there is also shown the numbers found at the time of the last Census, 1901, to be engaged in the occupations forming those groups, and the proportion which the male illiterates of the year bear to the total number in the occupations at the time of the Census. This comparison is not a satisfactory one, for the quantities are not strictly comparable, the one referring to the figures of 1904 and the other to those of three years previously. A comparison of the illiterates married during the year with the total in each group of occupations married during the year would have been preferable, but the latter figures are not available, and the less satisfactory comparison has to be used. The composition of the various groups of occupations quoted are similar to those in the Census Report, Volume III.

In the Table it will be seen that the greatest numbers of male illiterates married during the year are found to be engaged in occupations connected with mines and quarries and with iron, steel, and other metal manufacture—of the former there are 126, and of the latter 120. Of the former, 95 were married in the Roman Catholic Church, 69 of them having names which were characteristically foreign, the most being Polish. Of the latter, 80 were married in the Roman Catholic Church, 25 having Polish and other foreign names, while 35 had characteristically Irish names.

Among the group of occupations which includes general labourers, hawkers, itinerant musicians, &c., there were 93 illiterates married during the year. Of them, 36 were married in the Roman Catholic Church, 28 in the Established Church, and 4 in the Jewish Church; of the Roman Catholics in this group the majority, 24, had characteristically Irish names.

In the group of occupations concerned with the conveyance of men and goods there were 56 illiterates married during the year. Of them, 28 were Roman Catholic, and 22 Presbyterian. Of the former, 16 had characteristically Irish names, and were mostly employed as railway labourers; of the latter, the majority were carters or stablemen.

In the agricultural occupations there were 36 illiterates married during the year. Of these the majority were Presbyterian, 16 having been

TABLE D.—Showing Occupations of Male Illiterates Married during 1904.

OCCUPATION.*	Number at Date of Last Census.	Illiterates Married, 1904.	Illiterates per 100,000.

* For explanation of grouping of occupations, see Report on Scottish Census, Volume III.

married in the Established Church and 8 in the United Free Church; Roman Catholics among the remainder numbered 10.

Among those engaged in the building trades and married during the year there were 26 illiterates; of them, 15 were Roman Catholics and 9 Presbyterians. Of the former, 8 had characteristically Irish names.

Among those engaged in the making of dress there were 18 illiterates, of whom 11 were Jewish tailors; among those engaged in wood manufacture, upholstery, and decoration, there were 17 illiterates, of whom 7 were Jews and 1 a foreigner; among brick, cement, pottery, and glass workers, there were 13 illiterates; among those engaged in chemical manufacture there were 11; among those engaged in textile manufacture there were 10; and among those in gas, water, and sanitary service 10, 9 of whom were Roman Catholics, 5 of them having characteristically Irish names. In the other groups of occupations there were less than 10, in 6 groups there were none.

The rates shown in Table D, as already stated, are not very reliable; but, so far as they go, they tend to show that illiterates are relatively most frequent among brick, cement, pottery, and glass workers; among those engaged in gas, water, and sanitary services; among general labourers and others with ill-defined occupations; among miners; and among those engaged in the manufacture of chemical products, oil, soap, and the like.

The nationalities of all these illiterates cannot from the registers be decided with accuracy, but from a scrutiny of the names it is probable that of the 554 males 21 were Jews, 111 Poles and other foreigners, and 170 Irish; it would thus appear that less than half of them are of Scottish abstraction or upbringing. Of the 742 female illiterates married, 27 appear to be Jews, 149 Poles or other foreigners, and 112 Irish; there were thus 454 who may have been of Scottish descent and upbringing.

Of the male Jewish illiterates most were engaged in the making of dress, or as cabinetmakers, or decorators. Of the male Polish and other foreign illiterates the majority were engaged in mining or in the manufacture of steel and iron. Of the Irish illiterates the most were engaged in iron and steel manufacture or working as general labourers.

Attention has above been drawn to the relative excess of illiterates married in the Roman Catholic Church. The facts above related are sufficient to show that prevalence of the marriages of Poles and other foreigners—and, perhaps, of Irish—is sufficient to explain why the statistics of that Church compare unfavourably with those of the other Churches.

The average number of marriages registered daily during the year was 88. The daily average was greatest in June, 163; and least in May, 37. In January it was 132, in December 129, in July 127, in April 77, in September 72, in October 70, in November 67, in August 66, in February 63, and in March 55.

The marriage-rate of the United Kingdom for the year was 7·3, of England and Wales 7·6, and of Ireland 5·2. The marriage-rate of Scotland was thus 0·3 less than that of the United Kingdom, 0·6 less than that of England and Wales, but 1·8 more than that of Ireland.

The following are the marriage-rates of some European countries for 1904:—Servia 11·4, Hungary 9·1, Prussia 8·1, Roumania 8·1, Belgium 8·0, Spain 7·7, France 7·6, Switzerland 7·4, Italy 7·4, Holland 7·3, Denmark 7·2, Norway 5·9.

DEATHS.

Table 1. Deaths registered in Scotland during 1904 numbered 77,981. This number is 1979 more than in the previous year, and 269 more than the average number registered annually during the preceding ten years. Of

Table 17. these deaths, 38,851 were of males and 39,130 of females; the former are 715 more than in the previous year, the latter 1264 more than in that year.

The death-rate per thousand of the estimated population of the year was 16·85—a rate which is 0·25 more than that of the previous year, but 0·94 less than the mean of the rates of the preceding ten years. The death-rate of the male population amounted to 17·23 per thousand, and of the female population to 16·49 per thousand.

The death-rate of the year, though slightly higher than that of the previous year, is a low one. Since these Annual Reports were instituted there are only three years in which the death-rate for Scotland was below 17 per thousand, and this is one of those three years. Previous to 1880 it was on only one occasion less than 20 per thousand; between 1880 and 1895 it ranged between 18 and 21; since 1895 the annual death-rate has been between 18 and 19 four times, between 17 and 18 twice, and under 17 three times.

Table 5. The death-rates in the groups of registration districts ranged from 17·97 in the Principal Town Districts to 15·15 in the Insular-Rural Districts. In the Large Town Districts it was 17·28, in the Small Town Districts 15·62, and in the Mainland-Rural Districts 15·52. These rates in the Small Town Districts and Insular-Rural Districts are lower than in the preceding year; in the remaining groups of districts they are somewhat higher than in that year.

Table 5. The death-rates of the divisions of the counties ranged from 17·82 in the South-Western and 17·06 in the Southern, to 15·49 in the North-Eastern; in the East-Midland it was 16·64, in the North-Western 16·53, in the South-Eastern 15·98, in the West-Midland 15·80, and in the Northern 15·63

In the counties the death-rate ranged from 18·20 in Forfar, 18·16 in Lanark, 17·87 in Renfrew, 17·66 in Roxburgh, 17·58 in Dumfries, and 17·45 in Caithness, to 13·11 in Berwick, 13·72 in Haddington, 14·03 in

TABLE VI.—Showing Deaths and Death-rates in the Groups of Registration Districts in 1903 and 1904.

	1904.			1903.		
	Population.	Deaths.	Death-rate.	Population.	Deaths.	Death-rate.
Principal Town Districts, -	2,061,296	37,033	17·97	2,028,355	35,853	17·68
Large Town Districts, -	601,565	10,398	17·28	594,745	9,857	16·57
Small Town Districts, -	930,593	14,540	15·62	920,460	14,468	15·72
Mainland-Rural Districts, -	919,637	14,274	15·52	920,455	13,978	15·19
Insular-Rural Districts -	114,565	1,736	15·15	115,208	1,846	16·02
SCOTLAND, - - -	4,627,656	77,981	16·85	4,579,223	76,002	16·60

Orkney, 14·03 in Kincardine, and 14·47 in Linlithgow. In 2 counties the death-rate was more than 18 per thousand—namely, in Forfar and Lanark; in 4 counties it was between 17 and 18—namely, in Caithness, Renfrew, Roxburgh, and Dumfries; in 8 counties it was between 16 and 17—namely, in Sutherland, Ross and Cromarty, Inverness, Nairn, Clackmannan, Dumbarton, Edinburgh, and Wigton; in 9 counties it was between 15 and 16—namely, in Elgin, Aberdeen, Perth, Fife, Kinross, Stirling, Bute, Ayr, and Kirkcaldy; in 8 counties it was between 14 and 15—namely, in Shetland, Orkney, Banff, Kincardine, Argyll, Linlithgow, Peebles, and Selkirk; in 2 counties it was less than 14—namely, in Haddington and Berwick.

In the principal towns the death-rate ranged from 20·23 in Dundee and 19·66 in Coatbridge, to 13·33 in Kirkcaldy and 14·72 in Partick. In Glasgow it was 19·31, in Paisley 18·77, in Perth 18·06, in Greenock 17·85, in Aberdeen 17·76, in Hamilton 17·01, in Edinburgh 16·60, in Kilmarnock 15·28, in Govan 15·02, in Motherwell 15·28, and in Leith 14·73. *Table 4.*

When the death-rates of the principal towns are compared with the mean of the death-rates of the last ten years, it is found that the death-rate of Leith is 2·9 less than that mean, that of Motherwell 2·7 less, that of Edinburgh 2·1 less, of Kirkcaldy 1·9 less, of Govan 1·8 less, of Glasgow 1·7 less, of Greenock 1·6 less, of Hamilton 1·5 less, of Kilmarnock 1·3 less, of Partick 1·1 less, of Perth 0·9 less, of Paisley 0·6 less, of Aberdeen 0·5 less, of Dundee 0·1 less, while that of Coatbridge is 0·1 more than the mean. *Table 21.*

When the death-rates of the counties are corrected—that is, adjusted so as to allow for the age and sex distribution of the population—it is found that the highest county death-rates are in Renfrew, Lanark, Forfar, and Edinburgh, and that the lowest county death-rates are in Orkney, Shetland, Sutherland, and Berwick. The corrected death-rate of Renfrew was 20·67, of Lanark 19·33, of Forfar 17·91, and of Edinburgh 17·45; while that of Orkney was 10·79, of Shetland 10·96, of Sutherland 11·90, and of Berwick 11·97. *Table 19.*

The corrected death-rates of the principal towns ranged from 21·39 in Glasgow, 21·32 in Dundee, 21·27 in Coatbridge, and 19·64 in Paisley, to 13·95 in Kirkcaldy, 15·65 in Leith, 16·23 in Partick, and 16·56 in Govan. The corrected death-rate of Greenock was 18·76, of Perth 18·12, of Hamilton 17·85, of Aberdeen 17·63, of Kilmarnock 17·34, of Edinburgh 17·29, and of Motherwell 16·86.

In 6 counties the corrected death-rate was higher than the death-rate of Scotland—namely, in Renfrew, Lanark, Forfar, Edinburgh, Roxburgh, and Dumbarton; while in the remaining 27 counties the corrected death-rate was less than that for Scotland. In 4 of the principal towns the corrected death-rate was less than that for Scotland—namely, in Kirkcaldy, Leith, Partick, and Govan; while in the remaining 11 principal towns it was higher than that for Scotland.

Of males dying during the year, 13,824, or 35·58 per cent., were under five years old; 2688, or 6·92 per cent., were between five and twenty years old; 11,553, or 29·73 per cent., were between twenty and sixty; and 10,780, or 27·75 per cent., were over sixty. Compared to the mean of the proportions to be in these age-groups during the last ten years, the proportions under five and between twenty and sixty are less than those means, while the proportions between five and twenty and over sixty are more than those means. Of the female deaths, 11,704, or 29·91 per cent., were under five years old; 2860, or 7·31 per cent., were between five and twenty; *Tables 22, 24, and 25.*

11,234, or 28·71 per cent., were between twenty and sixty; and 13,332, or 34·07 per cent., were over sixty. The proportions of the female deaths in the age-groups under five, between five and twenty, and between twenty and sixty, are less than the mean of those proportions during the last ten years, while the proportion to be over sixty is higher than the mean of the last ten years.

Tables 28 and 29. Deaths under one year old numbered 16,329, a number which is 636 more than in the previous year, and equivalent to an infantile mortality of 123·1 per thousand births. This infantile mortality rate is 5·6 higher than that of the previous year, but 2·7 less than the mean of the rates of the ten preceding years. The infantile mortality rate in the groups of registration districts ranged from 141·5 in the Principal Town Districts to 71·5 in the Insular-Rural Districts; in the Large Town Districts it was 129·9, in the Small Town Districts 111·6, and in the Mainland-Rural Districts 89·0. Compared to the rates of the previous year, that of the Principal Town Districts is 6·3 higher, of the Large Town Districts 15·4 higher, of the Small Town Districts 2·4 higher, of the Mainland-Rural Districts 1·4 higher, while that of the Insular-Rural Districts is 0·7 lower.

The infantile mortality rate in the divisions of the counties ranged from 132·5 in the South-Western and 121·6 in the East-Midland, to 77·4 in the Northern and 93·3 in the North-Western; in the South-Eastern it was 121·1, in the North-Eastern 116·5, in the West-Midland 108·6, and in the Southern 105·1. In the counties this rate ranged from 145·3 in Forfar, 138·3 in Lanark, 125·9 in Kincardine, 125·6 in Edinburgh, and 124·5 in Nairn and Linlithgow, to 46·2 in Shetland, 68·8 in Kinross, 70·7 in Sutherland, 72·0 in Argyll, and 76·9 in Bute. In 12 counties this rate was lower than that of the previous year; in 21 counties it was higher. The largest diminutions were in Kinross and Haddington; the largest increases were in Orkney and Forfar.

The infantile mortality rate in the principal towns ranged from 175·2 in Dundee, 150·7 in Aberdeen, 150·2 in Coatbridge, and 145·9 in Glasgow, to 114·7 in Hamilton, 118·9 in Kirkcaldy, and 121·5 in Leith. In Partick this rate was 138·4, in Govan 135·6, in Paisley 135·5, in Edinburgh 130·9, in Kilmarnock 127·9, in Perth 127·0, in Greenock 123·4, and in Motherwell 122·2. In Govan, Leith, Greenock, and Hamilton the rate was lower than in the previous year, in the remaining towns it was higher. The principal towns in which the increase of the infantile mortality rate was greatest were Dundee, where the rate of 1904 was 33·0 more than that of 1903; Perth, where the rate was 28·1 more; and Partick, where the rate was 27·0 more.

The infantile mortality among male children for the year was 135·0, and among female children 110·7.

Tables 22 and 23. Deaths of children of one year old numbered 5270, a number which is 736 more than that of the previous year, the death-rate of male children per thousand of the estimated male population of that age being 48·62, and of female children 48·78; both these rates are higher than those of the previous year. The male death-rate at this age ranged from 65·89 in the Principal Town Districts to 21·04 in the Insular-Rural Districts. The death-rate of female children of this age ranged from 65·60 in the Principal Town Districts to 20·61 in the Insular-Rural Districts. In the principal towns the death-rates of children of this age, both sexes combined, ranged from 81·6 in Dundee and 77·1 in Motherwell, to 29·5 in Kirkcaldy and 37·0 in Perth.

Table 27.

Deaths of children of two years old numbered 2019; this is 222 more than in the previous year. The male death-rate at this age was 18·91 per thousand, and the female death-rate 17·86; both these rates are higher than the rates of the previous year. The death-rate of male children of this age ranged from 24·58 in the Principal Town Districts to 10·14 in the Mainland-Rural Districts, and of female children from 23·07 in the Principal Town Districts to 9·96 in the Mainland-Rural Districts. In the principal towns the death-rate at this age, both sexes combined, ranged from 33·0 in Motherwell to 14·8 in Edinburgh.

Deaths of children of three years old numbered 1121; this is 86 more than in the previous year. The death-rate of males of this age was 10·05, and of females 10·66. The male death-rate ranged from 12·66 in the Principal Town Districts to 3·47 in the Insular-Rural Districts, and the female death-rate from 14·99 in the Principal Town Districts to 6·06 in the Mainland-Rural Districts. In the principal towns the death-rate at this age ranged from 17·8 in Motherwell to 6·9 in Kirkcaldy.

Deaths of children of four years old numbered 789; this is 16 more than in the previous year. The death-rate of male children of this age was 7·75, and of female children 7·04. The male death-rate at this age ranged from 9·70 in the Principal Town Districts to 3·81 in the Insular-Rural Districts, and the female death-rate from 8·13 in the Principal Town Districts to 5·25 in the Mainland-Rural Districts. In the principal towns the death-rate at this age ranged from 14·4 in Paisley to 4·5 in Perth.

The death-rate of males of between five and ten years old was 3·84, between ten and fifteen 2·76, between fifteen and twenty 4·24, between twenty and thirty 5·81, between thirty and forty 7·96, between forty and fifty 13·03, between fifty and sixty 25·14, between sixty and seventy 48·65, and between seventy and eighty 96·19. These rates at age-periods under twenty and over seventy are higher than those of the previous year, while those of the remaining age-periods are lower.

The death-rate of females of between five and ten years old was 4·34, between ten and fifteen 3·26, between fifteen and twenty 4·25, between twenty and thirty 5·51, between thirty and forty 8·24, between forty and fifty 10·96, between fifty and sixty 20·21, between sixty and seventy 40·31, and between seventy and eighty 81·75. These rates at age-periods under fifteen and over fifty are higher than in the previous year, those of other age-periods are lower than in that year.

The male death-rate is higher than the female death-rate in the following age-periods—under five years old, between twenty and thirty, and in all periods from forty to ninety. The female death-rate is higher than the male death-rate in age-periods from five to twenty and from thirty to forty.

Of the total male deaths of the year, 35·58 per cent. were of children of under five years old, and 27·75 per cent. of persons of over sixty; the former is 1·29 higher than in the previous year, and the latter 0·09 higher. Of the female deaths, 29·91 were of children of under five, and 34·07 of women of over sixty; the former is 1·51 more than in the previous year, but the latter is 0·31 less. Male deaths in the age-group under five in the Principal Town Districts constituted 40·41 per cent. of the total male deaths, in the Large Town Districts 39·03 per cent., in the Small Town Districts 34·79 per cent., in the Mainland-Rural Districts 23·19 per cent., and in the Insular-Rural Districts 18·84 per cent. Female deaths under five constituted 35·15 per cent. of the total female deaths in the Principal Town Districts, 32·61 per cent. in the Large

Town Districts, 27·70 per cent. in the Small Town Districts, 18·84 per cent. in the Mainland-Rural Districts, and 12·99 per cent. in the Insular-Rural Districts. Male deaths at ages over sixty in the Principal Town Districts were 20·83 per cent. of the total male deaths, in the Large Town Districts 25·79 per cent., in the Small Town Districts 30·28 per cent., in the Mainland-Rural Districts 42·47 per cent., and in the Insular-Rural Districts 46·68 per cent. Female deaths at over sixty in the Principal Town Districts constituted 26·76 per cent. of the total female deaths, in the Large Town Districts 31·06 per cent., in the Small Town Districts 38·41 per cent., in the Mainland-Rural Districts 47·59 per cent., and in the Insular-Rural Districts 58·66 per cent.

The average age at death of males in Scotland during the year was 34·0; in the Principal Town Districts 29·5, in the Large Town Districts 31·9, in the Small Town Districts 35·2, in the Mainland-Rural Districts 44·5, and in the Insular-Rural Districts 47·1. The average age at death of females in Scotland during the year was 38·4; in the Principal Town Districts 33·6, in the Large Town Districts 36·2, in the Small Town Districts 40·6, in the Mainland-Rural Districts 48·1, and in the Insular-Rural Districts 55·2.

During the year the deaths of 16 centenarians were recorded in Scotland, of whom 3 were men and 13 women. The oldest man was a blacksmith aged 102; and the oldest women were a crofter's widow aged 105, a carter's widow aged 104, a farmer's widow aged 103, and a farm servant's widow aged 103.

Table 45. The average number of deaths registered daily throughout the year was 213. The daily average in March was 253, in February 249, in December 241, in April 234, in January 232, in May 212, in November 204, in June 197, in August 190, in October 185, in September 182, and in July 178.

The death-rate of the United Kingdom for 1904 was 16·5, of England and Wales 16·2, and of Ireland 18·1. The death-rate of Scotland for the year is thus 0·4 more than that of the United Kingdom, 0·7 more than that of England, but 1·2 less than that of Ireland.

The following are the death-rates for 1904 in some European countries:—Spain 25·8, Hungary 24·8, Roumania 24·4, Servia 21·1, Italy 20·9, France 19·4, Prussia 19·3, Switzerland 17·8, Belgium 16·9, Holland 15·9, Sweden 15·3, Norway 14·4, and Denmark 14·1.

CAUSES OF DEATH.

The classification of the causes of death in this report is the same as used since 1901.

Of the 77,981 deaths registered in Scotland, in 621, or 0·8 per cent., the cause of death was not specified. The number of these deaths from unspecified causes is 52 less than in the previous year, 1903, 83 less than in 1902, and 104 less than in 1901. The number of such deaths is thus apparently a diminishing quantity.

Table 40. In 76,008 cases of death the cause of death was certified by a medical practitioner or by a procurator-fiscal after enquiry. These form 97·6 per cent. of the total. In the remaining 1893 cases, or 2·4 per cent. of the total deaths, the cause was not so certified. The proportion of deaths to be from uncertified causes in the previous year was 2·8 per cent., which is 0·4 more than that proportion this year. The percentage to be uncertified varied from 31·1 in the Insular-Rural Registration Districts to 1·0 in the Large Town Districts. In the Mainland-Rural Districts it was 3·5, in the

Principal Town Districts 1·5, and in the Small Town Districts 1·3. In the counties this rate ranged from 30·7 in Shetland, 24·1 in Ross and Cromarty, and 20·9 in Sutherland, to 0 in Kinross, 0·2 in Wigtown, 0·3 in Selkirk, and 0·4 in Peebles. In the principal towns this rate ranged from 3·8 in Edinburgh, 2·4 in Paisley, 1·8 in Greenock, and 1·3 in Glasgow, to 0·1 in Coatbridge, and 0·2 in Aberdeen, Perth, and Motherwell.

Of the 77,360 deaths, the causes of which were specified, 5144, or 6·7 per cent., were due to diseases of the nervous system; 12,403, or 16·0 per cent., to diseases of the circulatory system; 6590, or 8·5 per cent., to diseases of the respiratory system; 5128, or 6·6 per cent., to diseases of the digestive system; 2246, or 2·9 per cent., to diseases of the urinary system; 225, or 0·3 per cent., to diseases of the generative system; 370, or 0·5 per cent., to diseases of parturition (septic diseases excluded); 230, or 0·3 per cent., to diseases of the locomotor system; 128, or 0·2 per cent., to diseases of the skin; 2949, or 3·8 per cent., to violence; and 41,949 to general diseases.

Deaths from small-pox during the year numbered 185, 124 being of males, and 61 of females. The death-rate from this cause amounted to 4 per 100,000 of the estimated population. These deaths are 144 more than in the previous year, 105 more than in 1902, but 93 fewer than in 1901. The death-rate from this cause ranged from 5 per 100,000 in the Principal Town Districts to 1 per 100,000 in the Insular-Rural Districts. In the Small Town and Mainland-Rural Districts it was 4 per 100,000, and in the Large Town Districts 3 per 100,000. In the principal towns this rate was 38 in Greenock, 8 in Glasgow, 3 in Coatbridge and Kirkcaldy, 1 in Govan and Paisley, and 0 in the remainder of those towns. Of the small-pox deaths 71·9 per cent. were of persons aged 15 to 60. Tables 30, 31, 33, and 35.

Fevers were the cause of 432 deaths, of them 14 were ascribed to Typhus Fever, 410 to Enteric Fever, 2 to Cerebro-spinal Fever, and 6 to ill-defined fever. Deaths from Typhus Fever are 1 more than in 1903. Deaths from Enteric Fever are 142 fewer than in 1903, and are the fewest ever recorded in Scotland in any one year. The death-rate per 100,000 from Enteric Fever was 9; in the groups of registration districts it ranged from 11 in the Large Town Districts to 7 in the Mainland-Rural Districts. In the principal towns the rate ranged from 42 in Greenock and 14 in Paisley and Kilmarnock, to 0 in Motherwell and 2 in Aberdeen. Of the deaths from Enteric Fever 75·4 per cent. were of persons between 15 and 60 years old.

Deaths from Measles numbered 1512; this is 379 more than in the previous year, it is 124 more than in 1902, but 143 fewer than in 1901. The annual death-rate from Measles was 33 per 100,000, a rate which varied from 44 in the Insular-Rural Districts to 12 in the Mainland-Rural Districts; in the Principal Town Districts it was 43, in the Large Town Districts 42, and in the Small Town Districts 23. In the principal towns this rate ranged from 166 in Motherwell, 65 in Hamilton, and 63 in Paisley, to 0 in Kirkcaldy, 9 in Perth, and 18 in Edinburgh. Of the deaths from Measles 92·9 per cent. were of children of less than five years old.

Deaths from Scarlet Fever numbered 277. This is the smallest number of deaths from this disease recorded in Scotland in any year since the commencement of these reports. The previous smallest on record was in 1903, when these deaths numbered 407. Since 1874 deaths from Scarlet Fever have year by year shown an almost uninterrupted steady decline; in that year they were 6321, in the year now under review they were only 277. The death-rate from Scarlet Fever was 6 per 100,000, which is the smallest death-rate yet recorded from that disease; in 1903 it was 9,

Table 36. and the mean of the rates of the previous ten years was 16. The highest death-rate from this disease was in 1874, when it amounted to 182 per 100,000. The death-rate from Scarlet Fever for the year ranged from 7 in the Principal Town Districts and Large Town Districts, to 1 in the Insular Rural Districts. In the Mainland-Rural Districts it was 6, and in the Small Town Districts 4. In the principal towns the rate per 100,000 ranged from 13 in Aberdeen, and 9 in Glasgow and Hamilton, to 0 in Dundee and Kirkcaldy, and 2 in Govan and Leith. Of the deaths from Scarlet Fever 60·7 per cent. were of children of under five, and 24·9 per cent. of children of between five and ten.

Deaths from Diphtheria and Croup numbered 750, a number which is 35 more than in 1903, but 257 fewer than the average number during the previous ten years. The death-rate from these diseases combined was 16 per 100,000, which is the same as in 1903 and lower than that of any other previous year.

Deaths registered as due to Diphtheria numbered 663, the equivalent death-rate being 14 per 100,000, a rate which varied in the groups of registration districts from 18 in the Mainland-Rural Districts to 7 in the Insular-Rural Districts. In the Principal Town Districts it was 13, in the Small Town Districts 14, and in the Large Town Districts 16. In the principal towns this rate ranged from 33 in Perth and 31 in Hamilton, to 3 in Coatbridge, 4 in Leith, and 5 in Partick. Of the deaths from Diphtheria 67·0 per cent. were of children of under five, and 24·89 per cent. of children between five and ten.

Hooping-cough during the year was the cause of 2405 deaths, the largest number caused by any one of the acutely infectious diseases. The death-rate from it amounted to 52 per 100,000. The number of these deaths is 459 more than in the previous year, and 206 more than the average number registered during the previous ten years. The death-rate from Hooping-cough in the groups of registration districts ranged from 70 in the Principal Town Districts to 22 in the Insular-Rural Districts. In the Large Town Districts it was 55, in the Small Town Districts 40, and in the Mainland-

1871	1,442	1888	3		

Rural Districts 27. In the principal towns this rate ranged from 147 in Coatbridge, 92 in Aberdeen, and 90 in Partick, to 26 in Hamilton and 27 in Perth. Of the deaths from Hooping-cough 96·8 per cent. were of children of less than five years old.

Deaths ascribed to Influenza during the year numbered 674, the equivalent death-rate being 15 per 100,000. This number is 293 fewer than in the previous year, and the rate is 6 less. The death-rate from Influenza was highest in the Insular-Rural Districts, 42, and lowest in the Principal Town Districts, 11. In the Mainland-Rural Districts it was 19, in the Small Town Districts 16, and in the Large Town Districts 14. In the principal towns this rate ranged from 34 in Kilmarnock and 28 in Coatbridge, to 3 in Motherwell and 4 in Dundee. Of persons dying from Influenza 52·7 per cent. were over 60.

Deaths from diarrhœal diseases, including those from Diarrhœa, Epidemic Diarrhœa, Infective Enteritis, Enteritis, and Gastro-enteritis numbered 3158, a number which is 162 more than in the previous year, but 345 fewer than the average number during the previous ten years. The equivalent death-rate from these causes amounts to 69 per 100,000, a rate which is 3 higher than that of the previous year, but 13 lower than the mean of the rates of the previous ten years.

Deaths from Puerperal Septic conditions numbered 245, and the death-rate from it was 5 per 100,000 of the total population or 10 per 100,000 of

the female population. These rates are lower than those of the previous year, when they were 7 and 13. The death-rate from these diseases amounted to 1·85 per thousand births.

To Tuberculous diseases 10,158 deaths were ascribed, a number which is 432 more than in the previous year, and 125 more than the average number during the last ten years. The death-rate from these causes amounted to 221 per 100,000, that of the male population was 229, and of the female population 214. The death-rate of the two sexes combined is 7 higher than in the previous year, but 10 lower than the mean of the rates of the previous ten years. This rate in the Principal Town Districts was 239, in the Large Town Districts 232, in the Small Town Districts 204, in the Insular-Rural Districts 197, and in the Mainland-Rural Districts 194. In the principal towns this rate ranged from 289 in Dundee, 265 in Glasgow, and 246 in Perth, to 160 in Motherwell, 182 in Govan, and 189 in Partick and Kirkcaldy. Of persons dying from tuberculous diseases 63·2 per cent. were between 15 and 60 years old, and 20·4 were less than five years old.

Of the 10,158 deaths due to Tuberculosis 6738 were ascribed to Phthisis, 1256 to Tuberculous Meningitis, 1036 to Tuberculous Peritonitis and Tabes, and 1128 to other Tuberculous diseases. The death-rate from Phthisis per 100,000 was 147, from Tuberculous Meningitis 27, from Tuberculous Peritonitis and Tabes 22, and from other Tuberculous diseases 25. That from Phthisis is 1 more than in the previous year, from Tuberculous Meningitis 2 more, from Tuberculous Peritonitis 1 more, and that from other Tuberculous diseases 3 more. Of the deaths from Phthisis, 84·0 per cent. were of persons of between 15 and 60; of deaths from Tuberculous Meningitis, 70·9 per cent. were of children of under five; of deaths from Tuberculous Peritonitis and Tabes, 57·6 per cent. were of children of under five.

Malignant disease was the stated cause of death in 3920 cases, a number which is 122 more than that of the previous year and 535 more than the average number recorded during the previous ten years. The death-rate from these causes amounted to 85 per 100,000, a rate which is 1 higher than in the previous year, and 7 higher than the mean of the rates of the previous ten years. The death-rate from Malignant diseases among the male population amounted to 68 per 100,000, and among the female population to 102. The death-rate from Malignant disease in the groups of registration districts ranged from 95 in the Mainland-Rural to 74 in the Small Town Districts. In the Principal Town Districts it was 89, in the Insular-Rural Districts 80, and in the Large Town Districts 78. In the principal towns this rate ranged from 127 in Edinburgh, 112 in Dundee and Perth, and 107 in Aberdeen, to 39 in Govan, 51 in Kilmarnock, and 54 in Hamilton.

Deaths from Pneumonia numbered 6984, of which 766 were ascribed to Lobar Pneumonia, 2525 to Broncho-pneumonia, 37 to Epidemic Pneumonia, and 3656 to Pneumonia not otherwise specified. The death-rate from Pneumonia amounted to 152 per 100,000, a rate which is 11 higher than that of the previous year, and 20 higher than the average of the rates of the previous ten years. The death-rate from Pneumonia ranged from 188 in the Principal Town Districts to 77 in the Insular-Rural Districts. In the Large Town Districts it was 154, in the Small Town Districts 122, and in the Mainland-Rural Districts 109. In the principal towns this rate ranged from 229 in Glasgow and Govan, and 205 in Dundee, to 113 in Coatbridge, 122 in Hamilton, and 136 in Perth.

Bronchitis was the ascribed cause of 5698 deaths, the death-rate from it being 124 per 100,000. This number of deaths is 277 more than in the previous year, and the rate is 5 higher. In the groups of registration districts this rate ranged from 147 in the Principal Town Districts to 80 in the Insular-Rural Districts. In the Large Town Districts it was 131, in the Small Town Districts 105, and in the Mainland-Rural Districts 93. In the principal towns this rate ranged from 201 in Dundee, 177 in Paisley, and 167 in Hamilton, to 59 in Motherwell, 74 in Kirkcaldy, and 85 in Kilmarnock. Of persons dying from Bronchitis 43·3 per cent. were over 60, and 36·8 per cent. were under five.

Deaths from Apoplexies numbered 4225, a number which is 148 more than in the previous year. The death-rate from these causes amounted to 92 per 100,000, a rate which varied from 108 in the Mainland-Rural Districts to 72 in the Inland-Rural Districts. In the Large Town Districts it was 97, in the Small Town Districts 90, and in the Principal Town Districts 86. In the principal towns this rate ranged from 133 in Perth and 105 in Kilmarnock to 37 in Motherwell and 62 in Partick.

Among deaths from Ill-defined causes there were 2132 from Atrophy and Debility, 4346 from Old Age, 77 from Dropsy, 103 from Tumour, 88 from Abscess, 19 from Hæmorrhage, 51 from sudden death from unascertained cause, 7 from other ill-defined causes, and 570 from unspecified causes.

Deaths from Violent Causes numbered 2949, which is 165 fewer than in the previous year. The death-rate from these causes amounted to 64 per 100,000, a rate which is 5 lower than that of last year. The death-rate from Violent Causes among the male population was 94 per 100,000, and among the female population 36. In the groups of registration districts this death-rate ranged from 69 in the Principal Town Districts, to 58 in the Large Town Districts. In the Mainland-Rural Districts it was 64, in the Insular-Rural Districts 60, and in the Small Town Districts 59. In the principal towns this rate ranged from 122 in Coatbridge and 94 in Greenock to 23 in Partick and 29 in Govan.

Of the Violent deaths 2635 were accidental, 290 suicidal, 23 homicidal, and 1 by execution. Accidental deaths were 185 fewer than in the previous year, but those from suicide were 16 more, and from homicide 3 more.

Among the deaths from Accident there were 145 from accidents in coal mines, 16 from accidents in other mines and quarries, 198 from railway accidents, 13 from accidents with horses, 92 from accidents with road vehicles, 60 from accidents on ships, boats, or docks, 18 from accidents during building operations, 31 from accidents with machinery, 21 from accidents with weapons and implements, 343 from burning and scalding, 99 from poisons or poisonous vapours, 490 from drowning, 132 from overlaying, 143 from suffocation, 194 from falls, 56 from weather agencies, and 583 from accidental causes not specified.

Among the accidental deaths from poisons there were 17 from laudanum, 16 from chloroform, 11 from opium, 9 from coal gas, 4 from carbonic acid gas, 3 from arsenic, 3 from phosphorus, 3 from carbolic acid, 3 from ammonia, 2 each from alcohol, strychnine, cyanide of potassium, nicotine, and "narcotic," and 1 each from salts of sorrel, ethyl bromide, belladonna, carbonic oxide, sulphuric acid, prussic acid, atropine, colocynth, morphine, creosote, neboline compound, oxalate of potassium, Condry's fluid, sewer gas, "corrosive," and "poisonous gas."

Of the deaths by suicide 94 were by hanging, 79 by cuts and stabs, 46 by *Table 29.*

drowning, 27 by poison, 21 by shooting, 11 on railways, 8 by precipitation, and 5 by means not specified. Of the suicidal deaths by poisoning 9 were by laudanum, 8 by carbolic acid, 3 by prussic acid, 2 by coal gas, 1 each by arsenic, salts of sorrel, and turpentine, and 2 by poisons not specified.

Table 32.

Among each 10,000 deaths in Scotland during the year, 1312 were from tubercle, 903 from pneumonia, 737 from bronchitis, 562 from old age, 546 from apoplexy, 507 from malignant disease, 381 from violence, and 311 from hooping-cough.

WEATHER AND ITS INFLUENCE ON THE MORTALITY.

The following remarks on the weather of the year are the Notes made by Dr. Buchan, under the direction of the Council of the Scottish Meteorological Society, which appear in the Registrar-General's Quarterly Reports:—

The month of *January* was characterised by a rather low mean barometric pressure; a high mean temperature, with a slightly low mean daily range; a slightly low mean humidity; a mean rainfall, fractionally below the average, but falling on two days more than the average number; a considerable excess of winds of average force from a south-westerly quarter.

The mean barometric pressure was 29·710 inches, or 0·086 inch below the normal. Very low readings were recorded in connection with the passage of a deep disturbance across the north of Scotland on the night of the 13th, and the monthly range was very high, the extremes at Leith at sea-level being 28·525 inches on the morning of the 14th, and 30·679 inches on the evening of the 21st.

The mean temperature was 39°·0, or 1°·8 above the normal, the days being 1°·7 and the nights 2°·0 above their respective averages. The month was the mildest January since 1898, when the mean for the month was as high as 42°·9. Temperature was everywhere above the normal, the excess amounting to fully 2°·0 in the Lothians, Lower Clydesdale, Central Perthshire, and at Braemar. At few stations was the excess less than 1°·0. Low temperatures were recorded from 1st to 6th, and thereafter mild and cold spells alternated, the coldest subsequent days being 12th, 15th and 16th, 25th and 31st. The six days from 18th to 23rd had a mean temperature at places as much as 5°·0 above the normal, the 18th, 19th, or 27th being the mildest days of the month. Fort-William reported frost in shade on only five days, and Paisley on only four days. The absolute maximum was 58°·8 at Loanhead on the 9th; the minimum was 22°·0 at Drumlanrig and Stronvar on 17th and at Wolfelee on 25th.

The mean rainfall was 3·68 inches, or 5 per cent. below the normal. About a dozen places, including Glencarron, Braemar, and Edinburgh, reported an excess, usually small, and nearly one half of the stations recorded amounts within 10 per cent. of their averages. In central districts there was a slight, and in most northern districts a decided shortage, Dunrobin and Gordon Castle registering less than half the average. The greater part of the rain fell during the second and third weeks and towards the end of the month. Only four stations reported falls exceeding an inch on any one day of the month, the heaviest daily amounts being 1·56 inch at Greenock on 10th and 1·23 inch at Glencarron on 6th. On Ben Nevis the monthly amount was 21·70 inches, or 3·21 inches above the average of 20 years.

Snow was general on 15th, and in some districts light falls occurred from 10th to 12th or on other days early in the month. Thunder was reported at Lochbuie on 7th, Lednathie on 10th, Poltalloch on 10th and 15th, Monach on 27th, and Glencarron on 28th and 31st. Except from 16th to 27th moderate gales were somewhat frequent. An Aurora was observed at Laig on 7th and from Ben Nevis on 23rd. Bright sunshine was generally slightly deficient, but Inverness reported a large excess.

The month of *February* was characterised by an abnormally low mean barometric pressure; a low mean temperature, with a low mean daily range; an average mean humidity; a slightly high mean rainfall, falling on three days more than the average number; a large excess of winds of moderate force from an easterly quarter.

The mean barometric pressure was 29·479 inches, being 0·371 inch below the normal, and with the exception of 29·462 inches in 1885, the lowest mean pressure for February since observations were organised in 1856. Pressure was very low during the first three weeks of the month, frequently falling below 29 inches at sea-level. After the 22nd, much higher readings were recorded, the sea-level extremes at Leith being 28·526 inches on the morning of the 13th, and 30·311 inches on the evening of the 28th.

The mean temperature was 36°·2, or 2°·1 below the normal, the days being 2°·8 and the nights 1°·4 below their respective averages. The month was thus much colder than January, which had a mean temperature of 39°·0. There was a decided deficiency in all districts, greater in the east than in the west, and at few stations less than 1°·5. In most districts but few days had a temperature equal to the average, and there was practically no spell of mild weather during the month, though severe frosts were generally of short duration. Highest temperatures were generally recorded on 20th, 21st, or 27th, and lowest on 29th, and at a few places on 19th. At Edinburgh, frost in shade was registered on 15 days, and on grass on 22 days. The absolute maximum was 52°·8 at Glasgow on 21st, and the minimum 10°·8 at Braemar on 11th.

The mean rainfall was 3°·71 inches, or 22 per cent. above the average. As a result of the prevailing easterly winds nearly all eastern stations had a large excess, amounting to fully 50 per cent. at about a dozen stations. Dundee reported more than twice the average, and Aberdeen an excess of 85 and Perth of 75 per cent., whilst there was an excess of more than 60 per cent. at Dunrobin, Arbroath, and Smeaton. In the west and south-west rainfall was also above the average: in Wigtownshire by 50, in Bute by 30, and at Stornoway by 25 per cent. In Nithsdale, the Clyde area, at Stronvar, and Braemar, and in nearly all parts of Inverness-shire, there was a deficiency, amounting to 48 per cent. at Braemar, 42 at Glencarron, and about 30 at Glasgow. Nearly half the east coast rainfall was registered during the first eight days of the month, whilst in western districts the wettest periods were from 12th to 16th and from 19th to 21st. The heaviest daily falls reported were 2·50 inches at Lochbuie on 25th, and 1·65 inch at Greenock on the 19th. On Ben Nevis the monthly amount was 11·41 inches, or 2·03 inches below the average.

The weather was frequently of a very wintry character, moderate snow-storms being general on the 6th, 7th and 18th, less heavy snowfalls of a more local character occurring on several other days. Early in the month strong easterly winds caused heavy seas on the east coast, whilst from 12th

to 14th and on 20th and 21st the weather was very stormy. An Aurora was observed from Ben Nevis on the 8th, and a thunderstorm occurred there and at Fort-William on the night of the 12th. Bright sunshine was above the average at Fort-Augustus, but was in general very deficient, Glasgow recording less than half the normal.

The month of *March* was characterised by a high mean barometric pressure; a rather low mean temperature, with a mean daily range about the average; a slightly low mean humidity; a rather low mean rainfall, but falling on one day more than the average number; a large excess of winds of moderate force from a south-easterly quarter.

The mean barometric pressure was 29·952 inches, or 0·130 inch above the normal. Pressure at Leith was above 30 inches at sea-level from 1st to 6th, from 9th to 12th, and from 23rd to 27th. Lowest readings were everywhere recorded on the 29th, the extremes at Leith being 30·493 inches on the morning of the 24th, and 29·099 inches on the evening of the 29th, giving a range about equal to the average.

The mean temperature was 38°·4, or 1°·0 below the normal, the days being 1°·1 and the nights 0°·9 below their respective averages. Temperature was just equal to the average at Glencarron, and slightly above at Deerness and Paisley, but at all other stations there was a deficiency, generally between 0°·5 and 1°·5, but in Dumfriesshire about 2°·0. The month opened with low temperatures under the influence of easterly winds, the sheltered thermometer at Edinburgh and Leith failing to reach 40°·0 from 1st to 8th, and the minimum for the month occurring at many places on 1st or 2nd. Severe frosts also occurred on one or two days during the following week, with lowest readings for the month at many places on the 15th. Thereafter temperature was somewhat higher until 30th, the maximum for the month occurring generally on 19th, 20th, or 23rd. The absolute maximum was 59°·5 at Gordon Castle on 19th, and the minimum 13°·1 at Kingussie on 2nd.

The mean rainfall was 2·31 inches, or 19 per cent. below the normal. At Aberdeen, in parts of Forfarshire, at Leith, and in the extreme southern counties there was a moderate excess, amounting at Cally to 29 per cent. In all other districts there was a deficiency, which was greatest in some parts of Inverness-shire and along the shores of the Moray Firth. Thus at Inverness and Gordon Castle less than one inch was recorded, whilst at Glencarron the monthly amount of 2·95 inches was less than two-fifths of the average. A large part of the east coast rainfall was registered during the first eight days of the month, when easterly winds prevailed, whilst in western districts the wettest periods were from 16th to 22nd, and from 28th to 31st. The only daily falls of as much as one inch were 1·12 inch at Leadhills and 1·08 inch at Cargen, both on 28th. On Ben Nevis the monthly amount was 8·65 inches, or 5·54 inches below the average.

Moderate falls of snow, sleet, and hail were frequent in eastern districts early in the month, but no gales of more than local importance were reported, though the weather was frequently unsettled and inclement. A thunderstorm occurred at Cally on 29th. Bright sunshine was above the average at Inverness, Fort-Augustus, Fort-William, and on Ben Nevis, but deficient elsewhere.

The month of *April* was characterised by an extremely low mean barometric pressure; a mean temperature a little above the average, with

a slightly low mean daily range; a somewhat low mean humidity; a very high mean rainfall, with an unusually large number of rainy days; a remarkable excess of westerly winds of considerably more than average force.

The mean barometric pressure was 29·717 inches, or 0·171 inch below the normal. Pressure at Leith was above 30 inches at sea-level only from 18th to 21st, and on 24th and 25th. Highest readings were everywhere recorded on 18th or 19th, and lowest on 1st, 6th, or 13th, the sea-level extremes at Leith being 30·317 inches on the morning of the 19th, and 29·106 inches on the morning of the 6th.

The mean temperature was 45°·1, or 0°·9 above the normal, the days being 0°·6 and the nights 1°·3 above their respective averages. In the Western Islands the mean was below the average, but at nearly all mainland stations there was an excess, slight at most western places, but 2°·0 in Midlothian and rather more at Paisley and Wolfelee. From 1st to 10th the weather was cold and unsettled, but thereafter temperature was, except on one or two days, above the average, with highest readings generally on the 19th. At nearly half the stations frost in shade was not recorded; but on 1st Braemar registered 23°·3, and on the 21st the minimum on grass fell to 20°·0 at Ochertyre, 20°·5 at Braemar, and 23°·5 at Fort-William. The absolute maximum was 67°·5 at Dumfries on 19th, and the minimum 23°·3 at Braemar on 1st.

The mean rainfall was 3·95 inches, or 78 per cent. above the normal, being the largest April rainfall since 1867. Except along the east coast, where there was generally a shortage, amounting to 50 per cent. at Cupar and Smeaton, rainfall was greatly above the average. At Glenquoich, Invergarry, and Fort-Augustus the amounts were more than thrice the average; at Dunrobin, Lairg, Glencarron, and Fort-William nearly thrice; and at Stronvar, in the counties of Stirling and Linlithgow, and in the lower Clyde area more than twice. More than half the rainfall was registered between 1st and 10th, and in most districts the last nine days of the month were very wet. At Fort-William and Stronvar there were only two rainless days. Leadhills reported 1·91 inch on 2nd, and Stronvar 1·56 on 9th. The largest totals were 17·86 inches at Glenquoich and 13·29 at Glencarron. On Ben Nevis the amount was 26·57 inches, or 17·18 inches above the average of 20 years.

The first ten days were of a stormy character, a gale from W. and S.-W. being almost continuous at some western places. On one or two of these days the weather was very wintry, with snow, sleet, and hail in places. Again, on 24th and 25th there was a gale from W. and N.-W. Thunder occurred at Paisley and Glasgow on 1st, at Cally on 3rd, at Glencarron on 9th, in Central Perthshire on 13th, and at Stobo on 22nd. Auroras were noted at Deerness on 7th and 10th, and at Paisley on 30th. Bright sunshine was above the average at Inverness and Marchmont, very deficient at Fort-William and Fort-Augustus, and nearly the average at other stations.

The month of *May* was characterised by a low mean barometric pressure; a slightly low mean temperature, with a somewhat low mean daily range; a slightly low mean humidity; a high mean rainfall, with a large number of rainy days; a slight excess of winds of average force from east and south-west.

The mean barometric pressure was 29·869 inches, or 0·071 inch below

the normal. Lowest readings were everywhere noted on 2nd, and highest on 19th, 20th, or during last four days of the month, the sea-level extremes at Leith being 30.204 inches on 20th, and 29.247 inches on 2nd.

The mean temperature was $48^{\circ}5$, or $0^{\circ}5$ below the normal, the days being $1^{\circ}2$ below and the nights $0^{\circ}3$ above their respective averages. At a few stations there was a fractional excess, and at about half the mean was within $0^{\circ}5$ of the average. The greatest defect was $2^{\circ}0$ at Fort-Augustus. Cold weather was experienced from 1st to 12th, the ground minimum at Fort-William falling to $27^{\circ}0$ on the night of 3rd, and the sheltered thermometer at Lednathie to $27^{\circ}0$ on the night of 11th. Thereafter higher temperatures prevailed as a rule, with cold weather about the 20th, when frost in shade occurred at Braemar, Stobo, and Cally, and again about 24th. Except in south-eastern counties, where the maximum occurred on 16th, highest temperatures were noted towards the end of the month with readings frequently above $70^{\circ}0$. The absolute maximum was $77^{\circ}0$ at Kingussie on 30th, and the minimum $27^{\circ}0$ at Lednathie on 12th.

The mean rainfall was 3.00 inches, or 31 per cent. above the normal. Except at a few places in the north-east and extreme south there was a decided excess. The amount at Invergarry was more than twice the normal, whilst at Fort-Augustus and Fort-William, and in parts of the Lothians and Peeblesshire, the excess was from 60 to 80 per cent. On the other hand, a good many stations had an excess of less than 15 per cent. Rain was general in all districts from 1st to 9th, Fort-William reporting 1.18 inch on 1st, and falls exceeding half an inch occurring at many places on 1st, 5th, and 8th. From 12th to 18th rain fell on every day at some western places, and another rainy spell occurred from 23rd to 27th, Stronvar registering 0.92 inch on 23rd. On Ben Nevis the amount was 10.88 inches, or 3.21 inches above the average.

The weather was very unsettled and of a wintry character during the first ten days, snow, sleet, or hail occurring at many places. Hail occurred at several places also on 17th. Thunder was noted at Fort-William on 1st, 13th, and 26th, at Lednathie on 16th, 24th, and 26th, at Braemar on 1st and 26th, at Ben Nevis on 1st, at Aberdeen on 17th, and at several other places on some one of these days. Auroras were observed at Rothesay on 2nd and Ben Nevis on 6th. Bright sunshine was very deficient in most districts.

The month of *June* was characterised by a high mean barometric pressure; a slightly low mean temperature, with an average mean daily range; a slightly low mean humidity; a low mean rainfall, with one less than the mean number of rainy days; a considerable excess of winds of average force from north-east and east.

The mean barometric pressure was 29.996 inches, or 0.054 inch above the normal. Lowest readings were recorded on 15th and 16th, whilst at Leith the sea-level pressure was above 30 inches from 2nd to 12th, from 21st to 23rd, and from 27th to 30th, the extremes there being 30.393 inches on the morning of the 6th, and 29.376 inches on the morning of the 15th.

The mean temperature was $54^{\circ}3$, or $0^{\circ}6$ below the normal, the days being $0^{\circ}8$ and the nights $0^{\circ}4$ below their respective averages. At a few stations temperature was slightly above the normal, at the majority the differences were small, whilst at Fort-Augustus, Dumfries, and at several places on the east coast there was a deficiency of more than $1^{\circ}0$. At

most stations highest readings were recorded between 2nd and 6th, when temperature in western districts was much above the average, but in the south-east the 30th was the warmest day, Edinburgh and Leith having readings as high as 70°·0 only on that day, whilst at Montrose, Arbroath, and Broomlands the maximum for the month was below 70°·0. The coldest periods were from 10th to 12th, and from 26th to 28th. On 26th, 27th, and 28th ground frost occurred at Fort-William, and on 28th frost in shade at Lairg. The absolute maximum was 82°·0 at Paisley on 5th, and the minimum 31°·9 at Lairg on 28th.

The mean rainfall was 1·96 inch, or 24 per cent. below the normal. In the Edinburgh district, East Lothian, Peeblesshire, and at Stronvar, Fort-William, Fort-Augustus, and Glencarron there was a moderate excess, but in nearly all other districts there was a decided shortage. Thus Dundee and Montrose recorded hardly more than a quarter of the average, and Aberdeen, Lednathie, and Arbroath less than one half. At many places the month was the driest June since 1891, one or two east coast stations having only seven rainy days. On the 1st heavy falls were reported from many places, followed by a rainless spell in all districts until the 12th, when unsettled and rainy weather prevailed for a few days. From 27th to 29th hardly any rain fell. The heaviest falls of the month occurred on 1st, 14th, 16th, and 24th, the largest amounts being 2·31 inches at Glencarron on 16th, 1·43 inch at Stronvar on 14th, and 1·28 inch at Marchmont on 24th. At Inverness a fall of 0·71 inch on 1st was about half the total for the month, and in Berwickshire fully half the total was registered on the 24th. On Ben Nevis the monthly amount was 9·35 inches, or 1·73 inch above the normal.

From 15th to 17th the weather was very stormy. Thunder was reported from Marchmont and Drumlanrig on 24th, 25th, and 26th, and from a few places on one day. Bright sunshine was about the average in the south-east, but greatly above in the west. Early in the month dry north-east winds prevailed with somewhat cloudy skies on the east coast, and brilliant sunshine on the west, Fort-William recording 97 hours for the week ending 11th.

The month of *July* was characterised by a rather high mean barometric pressure; an average mean temperature, with a fractionally low mean daily range; a low mean rainfall, with one less than the average number of rainy days; a large excess of winds of moderate force from between north-east and south.

The mean barometric pressure was 29·964 inches, or 0·078 inch above the normal. At Leith the sea-level pressure was above 30 inches from 7th to 13th, from 17th to 20th, and on 28th, the extremes there being 30·368 inches on the morning of the 18th, and 29·574 inches on the morning of 1st.

The mean temperature was 57°·3, or 0°·1 above the normal, the days being 0°·2 below and the nights 0°·3 above their respective averages. In Perthshire, along the east coast north of the Tay, and in Orkney and Shetland, temperature was below the normal, whilst in the extreme south and at Fort-William, Glencarron, and Kingussie there was an excess of fully 1°·0. Nearly one-half of the stations were within 0°·5 of their averages. In most eastern districts there was a complete absence of hot weather, the maximum at Leith remaining below 60°·0 from 23rd to 28th, and reaching 70°·0 only on 13th and 29th. In the west and south higher

temperatures ruled, and on the 11th, Rothesay, Dumfries, and other stations had maxima of $80^{\circ}0$ or over. Lowest temperatures were noted at most places on 4th, 7th, or 18th, Braemar reporting ground frosts on 4th and 18th. The absolute maximum was $84^{\circ}7$ at Dumfries on 11th, and the minimum $35^{\circ}0$ at Lairg on 8th.

The mean rainfall was 2.11 inches, or 33 per cent. below the average. Fort-William and one or two other stations had a slight excess, but over the greater part of the country there was a decided shortage, most eastern and northern districts having less than half their normal amounts. Several aggregates of less than 1 inch were reported, the total of 0.81 inch at Inverness being little more than one-quarter of the average. The weather from 1st to 6th was unsettled and wet, while but little rain fell from 7th to 11th, from 17th to 19th, and from 24th to 30th. Very heavy falls were reported on 15th, especially in southern districts, Cargen registering 1.78 inch on that day, Leadhills 1.63, and Dumfries 1.40, or fully half the total for the month. On Ben Nevis the monthly amount was 8.03 inches, or 2.63 inches above the average of 20 years.

On 16th, rivers in the southern counties were in high flood. Thunderstorms of moderate intensity occurred at Lednathie on 2nd, 13th, 22nd, and 31st, and in most districts on one or more of these days. Fog was prevalent on the east coast on 11th, and from 23rd to 25th. Sunshine was deficient at Deerness, Glasgow, Paisley, and on the east coast, Edinburgh reporting none from 23rd to 27th during a spell of light north-easterly winds. Fort-William and Ben Nevis had a large excess, the west coast enjoying brilliant sunshine on 11th and 12th, from 17th to 19th, and from 26th to 28th.

The month of *August* was characterised by a rather high mean barometric pressure; a slightly low mean temperature, with a slightly low mean daily range; a rather low mean humidity; a high mean rainfall, with a large number of rainy days; an excess of moderate winds from N.-W.

The mean barometric pressure was 29.908 inches, or 0.050 inch above the normal. At Leith the sea-level pressure was above 30 inches on 2nd and 3rd, on 8th and 9th, on 20th and 21st, from 23rd to 25th, and on 28th and 29th, the extremes there being 30.167 inches on evening of 23rd, and 29.255 inches on morning of 15th.

The mean temperature was $56^{\circ}0$, or $0^{\circ}6$ below the normal, the days being $0^{\circ}2$ and the nights $1^{\circ}0$ below their respective averages. Temperature was decidedly above the average in the Edinburgh district, but slightly below at most stations, the greatest deficiencies being $1^{\circ}6$ at Cally and $1^{\circ}9$ at Peterhead and Fort-Augustus. The month opened with a spell of warm weather, with maxima for the month on 4th at fully one-half of the stations. Thereafter weather becoming steadily colder set in, until towards the end of the month, with lowest readings on 20th, 21st, or 25th. On 25th, Lairg and Kingussie reported frost in shade, and Braemar a reading of $24^{\circ}5$ by a thermometer exposed on grass. The week ending 27th had a mean temperature from $3^{\circ}0$ to $4^{\circ}0$ below the average. High temperatures occurred again from 28th to 30th. The absolute maximum was $84^{\circ}5$ at Tillypronie on 28th, the next highest reading being $79^{\circ}0$ at Broomlands on 30th, and at Dumfries on 3rd and 29th. The minimum was $31^{\circ}2$ at Kingussie on 25th.

The mean rainfall was 4.58 inches, or 27 per cent. above the average. Aberdeen had a deficiency of 28 per cent., and at several stations the

amount differed little from the normal, but in general there was a decided excess, which was more than 50 per cent. in the counties of Edinburgh, East Lothian, and Forfar. The number of rainy days was large, Glencarron reporting 28. Heavy falls occurred in the west on 1st, whilst in general the rainiest periods were from 4th to 7th and from 9th to 18th. A large number of stations had falls exceeding an inch on some one day. Thus Dundee reported 1·40 inch on 4th, Leadhills 1·61 on 6th, Rothesay 1·27 on 10th, Leith 1·29 on 11th, Stronvar 1·26 on 13th, Fort-William 1·52 on 14th, and Edinburgh 1·15 on 17th. In eastern and southern districts but little rain fell from 27th to 30th. On Ben Nevis the monthly amount was 11·69 inches, or 0·95 inch below the average.

On morning of 6th a thunderstorm was general on the east coast, whilst Duns and Smeaton reported thunder on six days. Bright sunshine was below or about equal to the average in the north and east, but above it in the west, Fort-William having about one-fourth more than its normal amount.

The month of *September* was characterised by a high mean barometric pressure; an average mean temperature, with a rather high mean daily range; a rather low mean humidity; a rather low mean rainfall, with comparatively few rainy days; a marked excess of winds of average force from a south-easterly quarter.

The mean barometric pressure was 30·011 inches, or 0·168 inch above the normal. At Edinburgh the sea-level pressure was above 30 inches continuously from 15th to 24th, and also on 1st, 3rd, 4th, from 10th to 12th, and from 27th to 29th. The monthly range was much below the average, the Edinburgh extremes being 30·389 inches on morning of 23rd, and 29·675 inches on morning of 30th.

The mean temperature was 52°·9, or 0°·1 above the normal, the days being 0°·6 above and the nights 0°·4 below their respective averages. Temperature was above the average in the Edinburgh district, but slightly below at most eastern stations, whilst towards the north-west there was an excess, that at Glencarron being 1°·9. Many places, however, differed but little from their averages. No remarkable fluctuations of temperature occurred, both maxima and minima falling at most places between 14th and 22nd, when the weather was controlled by a high-pressure area. A few stations in north and south-east reported readings above 70°·0 on 17th, 18th, or 19th, while frost in shade was registered at Braemar on 14th, 21st, and 28th, at Kingussie on 14th, 15th, and 29th, at Lairg on 21st and 28th, and at Drumlanrig on 21st. The absolute maximum was 72°·6 at Lairg on 19th, and the minimum 29°·1 at Kingussie on 14th.

The mean rainfall was 3·15 inches, or 13 per cent. below the normal. At Fort-William and in Central Perthshire there was a decided, and in the counties of Stirling, Dumbarton, Renfrew, Bute, and Wigtown a moderate, excess. But over the country generally there was a well-marked shortage, East Lothian and the Border Counties having less than half the average amount, and the high stations on the Grampians a deficiency of about 40 per cent. Hardly any rain fell from 13th to 23rd, except in some Central and western districts on 16th or 17th, and the number of rainy days was unusually small, the totals at most stations being largely accounted for by heavy falls on one or more days. Thus Fort-William, with the large monthly total of 9·58 inches, reported 1·45 on 4th, and 1·98 on 5th, whilst Greenock had falls of 1 inch or over on 2nd, 5th, and 29th. The first few

days of the month were very wet, and on the 6th the Perthshire rivers were in full flood, Stronvar having registered 1·02 inch on 4th, and 2·36 on 5th. At Edinburgh the aggregate for the 24th and 25th was 0·85 inch, or more than half the total for the month. On Ben Nevis the monthly amount was 13·15 inches, being 1·71 inch below the average.

Thunder was heard at Glencarron on 3rd, at Paisley on 6th, and at Buckleyvie on 16th. The weather was stormy in most districts on 4th and 5th. Bright sunshine was decidedly above the average, the greater part being registered during the 2nd and 3rd weeks of the month.

The month of *October* was characterised by an extremely high mean barometric pressure; a high mean temperature, with a slightly high mean daily range; a rather low mean humidity; an extremely low mean rainfall, with one less than the average number of rainy days; a large excess of moderate winds from W. and S.-W.

The mean barometric pressure was 29·982 inches, or 0·170 inch above the normal. At Leith the sea-level pressure was above 30 inches on 2nd, from 8th to 14th, from 18th to 20th, and from 25th to the end of the month. On 5th a rapid fall of the barometer took place, and on the night of 16th a minor disturbance occurred. The extremes at Leith were 30·478 inches on morning of 29th, and 28·833 inches on night of 5th.

The mean temperature was 48°·0, or 1°·5 above the normal, the days being 1°·7 and the nights 1°·3 above their respective averages. At Peterhead alone was temperature below the normal, and at most stations there was an excess of more than 1°·0, whilst in the Edinburgh and Glasgow areas and in a few other districts the excess was more than 2°·0. The mean temperature of the first two weeks was a little below the average, that of the third and fourth greatly above, whilst lower temperatures ruled from 29th to 31st under the influence of easterly winds. Lowest readings were noted at a few stations on 8th or 9th, but at most on 13th, when frost occurred in many districts. Highest temperatures occurred chiefly between 18th and 21st, but Dunrobin, Lairg, and Inverness reported their maxima on the 4th, and extreme southerly districts, theirs between 3rd and 5th. In the Edinburgh district frost in the shade did not occur during the month. The absolute maximum was 67°·5 at Tillypronie on 18th, and the minimum 22°·6 at Braemar on 13th.

The mean rainfall was 2·02 inches, or 50 per cent. below the normal, the month being on the whole the driest October since at least 1879 and in many districts the driest on record. At Lairg rainfall was slightly above the average, but all other stations on the mainland reported a decided shortage. Aberdeen, Montrose, Edinburgh, and Duns had only one-quarter of their average amounts, and in the eastern counties generally there was a deficiency of not less than 60 per cent. In western districts the shortage was relatively less, being 25 per cent. at Glencarron and Poltalloch, and ranging at most stations from 40 to 50 per cent. Heaviest falls occurred on 5th, when Glencarron registered 1·42 inch, Lochbuie 1·30, Lerwick 1·16, and Stronvar 1·14, the rainiest days of the month being 5th, 6th, and 16th. Lairg and Glencarron had 26 days with rain, but on the east coast there were very few such days, Smeaton having only 6, whilst at Dundee exactly half the total for the month was registered on 5th.

The weather was unsettled early in the month, and on the night of 5th a gale from S.-W. was general. A gale also from S.-W. occurred in some districts on night of 16th. Snow fell at Fort-Augustus on 7th and at

Braemar on 8th, and sleet or hail at one or two other stations on these days.

No thunder was reported. Bright sunshine was just equal the normal at Deerness and Paisley, but in general was decidedly in excess, Marchmont recording 32 hours above the average.

The month of *November* was characterised by a high mean barometric pressure; an average mean temperature, with a slightly high mean daily range; a rather low mean humidity; an extremely low mean rainfall, but with the average number of rainy days; a large excess of moderate winds from W. and N.-W.

The mean barometric pressure was 29·945 inches, or 0·115 inch above the normal. The most noteworthy fluctuation of the barometer was a rise of nearly 1 inch from 8th to 9th, the most rapid falls occurring on 2nd and 3rd, 7th and 8th, 18th and 19th, and on 21st. At Edinburgh the sea-level pressure was above 30 inches from 1st to 4th, on 10th, from 12th to 18th and on 26th, the extremes there being 30·491 inches on evening of 1st, and 29·178 inches on morning of 9th.

The mean temperature was 40°·8, or 0°·1 below the normal, the days being 0°·1 above and the nights 0°·3 below their respective averages. Most northern stations were below the average, Perth by 1°·8, Montrose by 1°·6, Aberdeen by 1°·4, and Lairg by 1°·3, and most southern stations above; but at many the differences from the normal were very slight. From 1st to 19th the prevailing winds were from W. and S.-W., and the weather as a rule was very mild, many stations not recording frost during that period. The week ending 19th was in most districts fully 5°·0 warmer than usual, but the maximum for the month was generally noted on the 3rd, when the thermometer rose from 60°·0 in eastern districts from Fife to Aberdeen. From 20th to 26th a notable spell of cold weather occurred under the influence of N.-W. winds. Lowest temperatures were usually noted on 22nd, when

TABLE X.—Monthly Mortality, Mean Temperature, and Mean Rainfall in Scotland during 1904, compared with the Mean of the Ten Years 1891-1900.

Kingussie reported a zero reading and Stronvar $7^{\circ}0$, or on 26th, when Braemar had a minimum of $7^{\circ}3$ and Stobo of $10^{\circ}0$. During this week temperature at many stations did not rise to $40^{\circ}0$ and was, as a rule, fully $7^{\circ}0$ below the normal. After 27th mild weather again prevailed. The absolute maximum was $64^{\circ}0$ at Cupar and Balruddery on 3rd, and the minimum $-0^{\circ}4$ at Kingussie on 22nd.

The mean rainfall was 2.31 inches, or 40 per cent. below the normal. In the islands of Lewis and Arran, in the extreme south-west, and at Glen-carron and Poltalloch, rainfall was above or just equal to the average; but over the country generally there was a pronounced shortage. Most eastern districts had much less than half their average amounts, several stations reporting less than 1 inch for the month, and Lednathie, Perth, and Cupar only one-fifth or less of their normal rainfalls. At Fort-Augustus and in Central Perthshire and the Upper Nith Valley the shortage was more than 60 per cent., but in general the deficiency was less towards the west and much less toward the north, being about 40 per cent. in the Clyde area and averaging about 20 per cent. in Caithness, Sutherland, and Ross. Between 7th and 9th heavy rains were general, Dunoon, Lochbuie, and Bowhill (Ayrshire) reporting amounts of 2 inches or over on 8th, and on the 10th the Doon and other southern rivers were in high flood. The wettest periods thereafter were from 16th to 20th in west, and from 21st to 23rd in north and east. In eastern districts hardly any rain fell from 1st to 5th and from 11th to 19th.

The weather was stormy from 7th to 10th and extremely unsettled during the cold week from 20th to 26th, a snowstorm occurring in all districts between 21st and 24th. Thunder was reported at Gordon Castle and Broomlands on 23rd and at Smeaton on 24th. A good deal of fog occurred towards the end of the month. Bright sunshine was a little above the average in nearly all districts.

The month of *December* was characterised by a mean barometric pressure nearly the average; a slightly high mean temperature, with an average mean daily range; an average mean humidity; a rather low mean rainfall, with the average number of rainy days; a slight excess of moderate winds from W.

The mean barometric pressure was 29.773 inches, or 0.009 inch below the normal. A fall of fully three-quarters of an inch on 11th and 12th gave lowest readings for the month on the latter day, whilst considerable disturbances occurred also on 4th and 29th. From 18th to 28th the barometer at Leith at sea-level remained above 30 inches, the extremes there being 30.557 inches on 19th and 28.870 inches on 12th.

The mean temperature was $38^{\circ}6$, or $0^{\circ}6$ above the normal, the days being $0^{\circ}6$ and the nights $0^{\circ}7$ above their respective averages. Except in the south of Scotland, and at Stronvar, Perth, Dundee, and Aberdeen, temperature was above the average, but at few stations by more than $1^{\circ}0$. A good deal of mild weather was experienced during the month, with highest temperature about 4th, 17th, or 29th. An exceedingly cold spell occurred from 7th to 14th with minimum readings on the night of the 10th, when the thermometer fell to $10^{\circ}0$ or under on the Grampians and at Lednathie and Stobo. In the south low temperatures ruled also on 26th and 27th. The absolute maximum was $57^{\circ}6$ at Corstorphine on 5th, and the minimum $6^{\circ}0$ at Braemar on the morning of 11th.

The mean rainfall was 3.59 inches, or 14 per cent. below the normal.

Rainfall was about the average at Glencarron and Nairn, slightly above in Midlothian and at Poltalloch, and decidedly above at Dollar, Stronvar, Fort-Augustus, and in Banffshire, Orkney, Shetland, and Lewis. In nearly all other districts there was a deficiency, amounting to 50 per cent. in Upper Teviotdale, and fully 40 per cent. at Braemar, Arbroath, Loch Leven, and Cally. The greater part of the precipitation occurred from 1st to 6th, and from 11th to 17th, on 28th and 29th, and, at some eastern stations, on 9th. Glencarron registered 2·38 inches on 29th, Leadhills 2·09 on 17th, and about half a dozen other stations falls of 1 inch or over on 4th, 12th, or 29th. From 18th to 27th very little rain fell.

The first half of the month was very unsettled, with gales from S.-W. on 4th and 5th, and from N. on 12th. On 29th and 30th there was a severe N.-W. gale with heavy rainfall. Between 7th and 12th a snowstorm was general over the country, whilst from 20th to 27th much fog occurred in more southerly districts. Thunder was reported at Paisley on morning of 30th. Bright sunshine was a little above the average except in Orkney.

I have the honour to be,

Sir,

Your most obedient Servant,

JAMES C. DUNLOP.

GENERAL REGISTRY OFFICE OF BIRTHS, &c.,
EDINBURGH, 24th August, 1906.

SUPPLEMENT,

BEING A NOTE OF SOME OF THE PRINCIPAL CHANGES
OBSERVED IN THE VITAL STATISTICS OF SCOTLAND
DURING THE FIRST HALF CENTURY OF NATIONAL
REGISTRATION.

By JAMES CRAUFURD DUNLOP, M.D., F.R.C.P. (EDIN.).

The Scottish Registration Act came into force on 1st January 1855. Since then a continuous description of the chief statistical facts abstracted from the registers has been published by this Office, and as the Detailed Annual Report now submitted completes fifty years of that record or description, a note of the principal statistical changes observed during these fifty years may not be without interest.

In 1855, the first year dealt with by this series of reports, the population of Scotland was estimated to be 2,978,065, the estimated population of fifty years later (1905) is 4,676,603, an increase of 1,698,538, or fully 57 per cent. In 1855 the population for statistical purposes was divided into that resident in towns with a population of over 10,000, that resident in mainland-rural districts, and that resident in insular-rural districts. That classification was not continued throughout this series of reports, but were it now in use the estimated population of the urban districts would be that which accounts for the greater part of the increase of the population in the country generally. In 1855 the population of the towns with over 10,000 inhabitants was estimated to be 1,075,093, fifty years later the same population was estimated to be 2,701,529, an increase of 1,626,436 or 151 per cent. In 1855 the estimated population of the mainland-rural districts was 1,764,378; fifty years later that population is estimated to have been 1,824,204, an increase of 59,826 or 3 per cent. The population of the insular districts of Scotland in 1855 was estimated to be 166,487, and the similar population in fifty years later to be 150,870, a decrease of 15,617, or 9 per cent. These comparisons clearly show that the large increase of population has not been one of the rural districts of the country, but one almost entirely confined to the urban districts, to the population living in towns of upwards of 10,000 inhabitants.

The total number of births recorded in the registers during the fifty years amounts to 6,030,438. The largest number recorded in any one year was in 1903, when it was 133,525, and the smallest number in 1855, when it was 93,349. The number of births annually registered has shown an almost continuous increase. From 1855 to 1860 the number of births registered annually ranged from 93,349 to 106,543, and averaged 102,462; from 1861 to 1870 the number of births ranged from 107,009 to 115,514, and averaged 112,079; from 1871 to 1880 the number of births ranged from 116,128 to 126,822, and averaged 123,231; from 1881 to 1890 the number of births ranged from 121,526 to 129,157, and averaged 125,193; from 1891 to 1900 the number ranged from 124,367 to 131,401, and averaged 128,004; while those from 1901 to 1904 ranged from 132,192 to 133,525, and averaged 132,647, being 30,185, or 29 per cent. more than in the first period.

The population of the country increased in these fifty years by 57 per cent. The number of births has increased by 29 per cent., and consequently the increase of births has not kept pace with the increase of population, and a diminution of the birth-rate has resulted. From 1856 to 1882 the birth-rate ranged from 33·5 to 35·6 per thousand, the highest rate being recorded in 1876. Since 1876 the birth-rate has shown a steady decline, in 1883 it fell below 33 per thousand, in 1887 below 32, in 1889 below 31, in 1894 below 30, and in 1904 below 29. This decline of the birth-rate is shown in the graphed record of the birth-rates in plate 1 of this appendix.

To further study this decline of the birth-rate, plate 2 has been prepared, in which the birth-rate of legitimate children per thousand married women of child-bearing age, 15 to 45, and the birth-rate of illegitimate children per thousand unmarried or widowed women of child-bearing age are shown. It may there be seen that both rates are diminished, but that the greater diminution is in the birth-rate of legitimate children per thousand married women of child-bearing age. That rate was 290 in 1855; three years later it had risen to over 310, and remained more than 310 till 1882, having reached a maximum of 328 in 1876 and 1877. Since 1882 the rate steadily diminished, falling below 300 in 1887, below 290 in 1890, below 280 in 1894, and reaching a minimum of 271 in 1904, the drop from the maximum, 329, to the minimum, 271, amounting to 58, or nearly 18 per cent. The illegitimate birth-rate per thousand unmarried and widowed women of child-bearing age in 1855 was 18·4. This rate increased to a maximum of 24·6 in 1871, since when it has steadily diminished, falling below 20 in 1883, and reaching a minimum of 12·9 in 1903—a drop of 11·7, or 48 per cent. About 42 per cent. of the women of Scotland of child-bearing age are married, and about 58 per cent. unmarried or widowed, and as the fall of the birth-rate of the former amounts to 58, and of the latter to 11·7, it may be concluded that the decline of the general birth-rate is largely due to the decline of the former rate.

The percentage of births to be illegitimate has also been a diminishing quantity. In 1855 the illegitimate births amounted to 7·88 per cent of the total, this percentage increased, reaching a maximum of 10·27 in 1866, since when it has steadily diminished, falling below 9 in 1874, below 8 in 1889, below 7 in 1898, and reaching a minimum of 6·21 in 1903. The proportion of the total births to be illegitimate has during the fifty years always been highest in the mainland-rural districts, and as the proportion of the total population living in those districts is now much smaller than formerly, the question arises as to whether the fall in the illegitimate rate is due to the smaller proportion of the population now living in the mainland-rural districts, where the illegitimate rate is highest. To test this point a calculation has been made, the birth-rate of illegitimate children per thousand of the population in each group of registration districts in 1866, the year with the highest illegitimate rate, has been applied to the populations of those groups of registration districts in 1904, and it is found that had those rates continued in 1904 there would have been in that year 11,347 illegitimate children, the actual number recorded being only 9010, or 21 per cent. less than that number. This demonstrates that the diminished illegitimacy of the country is not entirely due to the altered distribution of the population between the different groups of registration districts.

The total number of marriages registered during the fifty years is

1,287,616. The largest number in any one year was in 1899, when it was 32,978, and the smallest number in 1858, when it was 19,655. During the first six years of national registration the number of marriages varied from 19,655 to 21,369, and averaged 20,645; during the years 1861 to 1870 the number of marriages varied from 20,597 to 23,854, and averaged 22,422; during the decade 1871 to 1880 the annual number of marriages varied from 23,519 to 26,748 and averaged 25,355; during the decade 1881 to 1890 the annual number of marriages registered varied from 24,515 to 27,469, and averaged 25,939; during the decade 1891 to 1900 the number varied from 27,145 to 32,978 and averaged 29,866; while during the period 1901 to 1904 the number varied from 31,387 to 32,351 and averaged 31,980. These figures show that the number of marriages annually registered have steadily increased during the half century, the increase of the marriages of 1904 over those of 1855 amounting to 12,591 or an increase of 64 per cent. The amount of this increase is very similar to the amount of the increase of population during the period and consequently it is to be expected that the marriage-rate will show no very marked alteration.

The marriage-rate has shown comparatively small variations during the fifty years, the lowest recorded being in 1886, when it was 6·3 per thousand, and the highest in 1873, when it was 7·8 per thousand.

The influence of variations of the marriage-rate on the birth-rate may be seen in plate 1. From 1885 to 1880 the curves showing the marriage and birth-rates are nearly parallel, both rising and falling in the same periods, but after 1880 this was not so, for after then the birth curve fell with each fall of the marriage curve, but failed to recover when the marriage curve recovered.

The influence of the clerical denominations of the country as shown by a scrutiny of the marriage registers is charted in plate 3, where the percentages of the total marriages celebrated in the Established Church, in the Free and the United Presbyterian Churches combined and in the United Free Church, in the Roman Catholic Church, in the Episcopalian, in the other Churches combined, and of the irregular marriages are shown.

Marriages according to the rites of the Presbyterian Churches have every year been in a large majority. From 1855 to 1879 they constituted in each year over 80 per cent. of the total, and since 1880 have constituted between 72 and 80 per cent. of the total. This percentage has, however, been a diminishing quantity, and especially so during the latter twenty-five years of the half century, for during that time this proportion has fallen from 79·5 to 73·1 per cent.

Marriages according to the rites of the Established Church have during the fifty years numbered 584,893, and constituted 45·4 per cent. of the total marriages registered in Scotland. From 1855 to 1860 they varied in number from 8879 to 10,194, and averaged 9576; from 1861 to 1870 they varied from 9307 to 10,678, and averaged 9929; from 1871 to 1880 they varied from 10,744 to 12,187, and averaged 11,549; from 1881 to 1890 they varied from 11,507 to 12,408, and averaged 11,971; from 1891 to 1900 they varied from 12,371 to 14,687, and averaged 13,497; from 1901 to 1904 they varied from 14,167 to 14,803, and averaged 14,482. The proportion these marriages form of the total has been very constant; at the commencement of national registration they constituted 45·12 per cent. of the total, and fifty years later

they constituted 45·87 per cent.; there have been fluctuations, the maximum proportions were in 1857, when it was 47·7, and in 1887, when it was 47·0, while the minima were in 1865, when it was 43·1, and in 1864, when it was 43·6.

Marriages according to the forms of the Free Church* from 1855 to 1900, the year of the union of that Church with the United Presbyterian Church, numbered 246,888, and constituted 21·3 per cent. of the total marriages registered during that period. From 1855 to 1860 their number varied from 4645 to 4870, and averaged 4747; from 1861 to 1870 the number varied from 4930 to 5636, and averaged 5278; from 1871 to 1880 the number varied from 5287 to 5944, and averaged 5649; from 1881 to 1890 the number varied from 4866 to 5499, and averaged 5277; the number from 1891 to 1900 varied from 5259 to 6080, and averaged 5637. The proportion these marriages formed of the total marriages of the country was a diminishing quantity; in 1855 it was 23·7, a maximum percentage occurred in 1864 when it was 24·2, and since then the percentage has steadily fallen, being for the first time below 22 in 1873, for the first time below 20 in 1887, and below 19 in 1896.

Marriages according to the rites of the United Presbyterian Church from 1855 to the year of the union with the Free Church numbered 145,456, and constituted 12·5 per cent. of the total marriages registered during that period. From 1855 to 1860 their number varied from 2707 to 2952, and averaged 2756; from 1861 to 1870 the number varied from 2846 to 3422, and averaged 3214; from 1871 to 1880 the number varied from 2878 to 3603, and averaged 3305; from 1881 to 1890 the number varied from 2821 to 3252, and averaged 3011; from 1891 to 1900 the number varied from 3048 to 3567, and averaged 3293. The percentage these marriages formed of the total marriages was a diminishing quantity; in 1855 that percentage was 15·0, this was the highest; the next highest was in 1868, when it was 14·9, and since that date it has steadily diminished, falling below 14 in 1871, below 13 in 1872, below 12 in 1881, and below 11 in 1895, in which year the percentage was lowest, namely, 10·73.

The total number of marriages in the United Free Church from 1901 to 1904 was 35,026, and constituted 27·4 per cent. of the total of the country during that period, a proportion which is smaller than the sum of the proportions in the two Churches before the union.

Roman Catholic marriages during the fifty years numbered 122,901, and constituted 9·5 per cent of the total marriages registered in the country. From 1855 to 1860 the number of these marriages ranged from 1697 to 1953, and averaged 1846; between 1861 and 1870 they varied from 1778 to 2399, and averaged 2071; between 1871 and 1880 they varied from 2087 to 2461, and averaged 2286; from 1881 to 1890 they varied from 2241 to 2791, and averaged 2558; from 1891 to 1900 they varied from 2489 to 3419, and averaged 2934; from 1901 to 1904 they varied from 3184 to 3487, and averaged 3334. The proportion these marriages constitute of the total has been an increasing quantity; in the first twenty-five years that proportion only twice exceeded 10 per cent. and was thirteen times below 9 per cent.; in the second twenty-five years it exceeded 10 per cent. eleven times and was never less than 9 per cent.

* The union of the Free Church and United Presbyterian Church took place on 31st October 1900. For the purposes of this report the marriages celebrated according to the rites of the United Free Church during November and December of that year are proportionately divided and dealt with as Free Church marriages or as United Presbyterian marriages.

Marriages according to the rites of the Episcopal Church during the fifty years numbered 33,424, and constituted 2·6 per cent. of the total. These also have been increasing in numbers; from 1885 to 1860 they varied from 350 to 416, and averaged 383; from 1861 to 1870 they varied from 371 to 538, and averaged 465; from 1871 to 1880 they varied from 551 to 719, and averaged 646; from 1881 to 1890 they varied from 685 to 791, and averaged 732; from 1891 to 1900 they varied from 788 to 1033, and averaged 899; from 1901 to 1904 they varied from 876 to 969, and averaged 928. The percentage these marriages formed of the total has also increased. Previous to 1862 they formed less than 2 per cent. of the total, in 1888 they formed 3 per cent. of the total, and since that year have constituted over 3 per cent. in seven years and between 2 and 3 per cent. in nine years.

Marriages according to the rites of other Churches have numbered 85,077 and constituted 6·6 per cent. of the total marriages registered. The number of these has also increased. From 1855 to 1860 their number varied from 923 to 1217, and averaged 1057; from 1861 to 1870 they varied from 990 to 1516, and averaged 1324; from 1871 to 1880 they varied from 1350 to 1923, and averaged 1633; from 1881 to 1890 they varied from 1597 to 2025, and averaged 1728; from 1891 to 1900 they varied from 1920 to 2418, and averaged 2179; from 1901 to 1904 they varied from 2446 to 2592, and averaged 2522. The percentage these marriages constitute of the total marriages has also been an increasing quantity; during the first twenty-five years that percentage was under 5 four times, between 5 and 6 eight times, between 6 and 7 eleven times, and over 7 twice; in the second twenty-five years it was never under 6, it was between 6 and 7 ten times, between 7 and 8 fourteen times, and over 8 once.

Irregular marriages have shown a marked increase during the fifty years. They have in all numbered 31,762, or 2·5 per cent. of the total. During the earlier years of registration they were very few; before 1860 they averaged 17 per annum, from 1861 to 1870 they varied from 19 to 74, and averaged 41; from 1871 to 1880 they varied from 105 to 388, and averaged 263; from 1881 to 1890 they varied from 419 to 1033, and averaged 650; from 1891 to 1900 they varied 1119 to 1914, and averaged 1428; from 1901 to 1904 they varied from 1862 to 2091, and averaged 1958. The percentage these marriages formed of the total has markedly increased; from 1855 to 1875 that percentage was less than 1, from 1876 to 1882 it was between 1 and 2, from 1883 to 1887 it was between 2 and 3, from 1888 to 1890 it was between 3 and 4, from 1891 to 1898 it was between 4 and 5, and since 1899 it has been more than 5, reaching a maximum of 6·55 in 1902.

The marriage registers give good evidence of the improvement of the education of the population during these fifty years. Of the 1,287,615 men married during the fifty years, 82,903, or 6·4 per cent., were unable to sign the marriage registers by writing and did so by mark. Of the 1,287,615 women married during the period, 159,587, or 12·4 per cent., used the mark.

The number of men using the mark for this purpose remained fairly constant from 1855 to 1875, but since then has steadily diminished; from 1855 to 1860 it varied from 2588 to 2189, and averaged 2,335; from 1861 to 1870 it varied from 2697 to 2062, and averaged 2387; from 1871 to 1880 it varied from 2676 to 1674, and averaged 2150; from 1881 to 1890 it varied from 1836 to 1000, and averaged 1381; from 1891 to 1900 it

varied from 955 to 584, and averaged 740; from 1901 to 1904 it varied from 618 to 554, and averaged 578.

The number of women using the mark when signing the marriage registers also remained fairly constant for the first twenty years of the half century, but since then has steadily diminished. From 1855 to 1860 this number varied from 5305 to 4506, and averaged 4803; from 1861 to 1870 it varied from 5427 to 4154, and averaged 4737; from 1871 to 1880 it varied from 5261 to 3519, and averaged 4321; from 1881 to 1890 it varied from 3624 to 1763, and averaged 2543; from 1891 to 1900 it varied from 1584 to 897, and averaged 1162; from 1901 to 1904 it varied from 839 to 742, and averaged 785.

Men who used the mark were four times as numerous in 1855 as they were in 1904, while women who did so in the first year of the half century were six times as numerous as in the last year of the half century.

The percentage of the total men married who signed the register by the mark has steadily declined. In 1855 this percentage was 11·4, it reached a maximum of 12·1 in 1857, it was less than 10 per cent. for the first time in 1868, less than 9 per cent. for the first time in 1875, less than 8 per cent. in 1876, less than 7 per cent. in 1878, less than 6 per cent. in 1885, less than 5 per cent. in 1886, less than 4 per cent. in 1888, less than 3 per cent. in 1893, less than 2 per cent. in 1898, and reached a minimum of 1·7 per cent. in 1903 and 1904.

This rate among women married in 1855 was 22·9, and was at a maximum in 1857, when it reached 24·7; since then it has steadily declined, falling below 20 in 1868, below 15 in 1878, below 10 in 1885, below 5 in 1892, below 4 in 1896, below 3 in 1899, and reaching a minimum of 2·3 in 1903 and 1904.

The reduction of these rates has been common to each of the groups of registration districts, but has been most marked in the Insular-Rural group, where the percentage of men using the mark was as high as 29·6 and has fallen to a minimum of 3·8, and where the percentage of women using the mark was as high as 45·6 and has fallen to 6·2.

In the Principal Town Districts the percentage of men signing the marriage register by the mark in 1855 was 13·1, this rate fell below 10 in 1875, below 8 in 1878, below 6 in 1885, below 4 in 1891, and reached a minimum of 1·7 in 1903. The percentage of women in these districts who signed the register by the mark in 1855 was 26·4, it reached a maximum of 28·6 in 1864, it fell below 20 in 1875, below 10 in 1886, below 5 in 1893, and reached a minimum of 2·2 in 1903.

In the Mainland-Rural and Small Town Districts combined this rate among men in 1855 was 9·5 per cent., it fell below 7 per cent. in 1875, below 5 per cent. in 1885, below 3 per cent. in 1888, below 2 per cent. in 1896, and reached a minimum of 1·4 per cent. in 1898 and 1902. The corresponding rate for women in 1855 was 19·1, it fell below 15 in 1862, below 10 in 1881, below 5 in 1890, below 3 in 1895, and reached a minimum of 1·8 in 1899.

The percentage of men who signed the marriage registers by the mark in the Insular-Rural Districts in 1855 was 26·0, the maximum percentage being in 1866, when it was 29·6, it fell below 20 in 1869, below 15 in 1886, below 10 in 1894, and below 5 in 1902, reaching a minimum of 3·8 in 1903. The corresponding rate among the women married in these districts in 1855 was 45·6, it fell below 40 in 1862, below 30 in 1882, below 25 in 1894, below 20 in 1899, below 15 in 1900, below 10 in 1902, and reached a minimum of 6·2 in 1903.

Deaths registered during the fifty years have numbered 3,683,478. The largest number in any one year was in 1891, when it was 83,573, and the smallest number in any one year, 1856, when it was 58,529. From 1855 to 1860 the number of deaths varied from 58,529 to 68,170, and averaged 62,644; from 1861 to 1870 it varied from 62,341 to 75,875, and averaged 70,620; from 1871 to 1880 it varied from 73,347 to 81,767, and averaged 76,395; from 1881 to 1890 it varied from 71,174 to 79,004, and averaged 74,358; from 1891 to 1900 it varied from 70,677 to 83,573, and averaged 78,186; from 1901 to 1904 it varied from 76,002 to 80,107, and averaged 78,008. The average number of deaths in the last period was 15,364, or 24·5 per cent., more than in the first period. This amount of increase is only about one half of the increase of population, and, consequently, although the number of deaths registered year by year has been an increasing quantity, yet that number has not increased at the same rate as the population.

The general death-rate of the country has been diminishing. From 1855 to 1875 it ranged from 19·5 in 1856 to 23·6 in 1864, it was more than 23 three times, between 22 and 23 nine times, between 21 and 22 three times, between 20 and 21 five times, and below 20 only once. From 1876 to 1895 the maximum was 21·2, it was once over 21, six times between 20 and 21, seven times between 19 and 20, four times between 18 and 19, and once below 18, which was in 1894, when it was 17·1. Since 1896 it was four times between 18 and 19, the maximum being 18·5 in 1900, twice between 17 and 18, and three times below 17, the minimum being recorded in 1903, when it was 16·6. This decline of the general death-rate of the country has been largely due to the decline of the death-rate in the urban districts.

The death-rate in the Principal Town Group of Registration Districts from 1855 to 1875 ranged from 25·8 in 1859 to 30·7 in 1864, twice being over 30, six times between 28 and 30, twelve times between 26 and 28, and only once less than 26; since 1875 this death-rate has only once been over 25, which occurred in 1878, it was less than 22 for the first time in 1886, less than 20 for the first time in 1888, less than 19 for the first time in 1894, and less than 18 in the years 1903 and 1904.

The death-rate in the Large Town Group of Registration Districts also shows a marked decline. Up to 1875 it ranged from 22·4 in 1856 to 27·6 in 1874; since 1876 the maximum was 24·7, in 1878 and since then it has steadily declined, being below 20 for the first time in 1881, below 19 for the first time in 1885, and below 17 for the first time in 1896.

The death-rate in the Small Town Registration Districts, that is in towns with a population of between 2000 and 10,000, also shows a decline. Previous to 1875 it ranged from 19·6 in 1856 to 23·8 in 1864, it was less than 20 for the first time in 1877, less than 19 for the first time in 1881, less than 17 for the first time in 1894, and less than 16 in the years 1901, 1902, and 1903.

The death-rate in the Mainland-Rural Group of Registration Districts has not shown the same decline, but has remained fairly constant. Between 1855 and 1865 it ranged between 15·1 and 18·3, from 1866 to 1875 it ranged between 16·1 and 19·1, from 1876 to 1885 it ranged from 15·9 to 17·3, from 1886 to 1895 it ranged from 15·4 to 17·4, from 1896 to 1904 it ranged from 15·0 to 16·3.

The death-rate in the Insular-Rural Districts has also shown but little change. From 1855 to 1865 it ranged from 13·0 to 21·3, from 1866 to 1875 it ranged from 13·9 to 20·2, from 1876 to 1885 it ranged from 14·8 to 3·3, from 1886 to 1895 it ranged from 14·7 to 17·9, from 1896 to 1904 it ranged from 13·7 to 18·0.

In the first year of registration the death-rate in the Principal Town Districts was 27·5, in the Large Town Districts 25·1, in the Small Town Districts 20·8, in the Mainland-Rural Districts 16·8, and in Insular-Rural Districts 13·0. At the end of the half-century the rate in the Principal Town Districts had declined 9·5 and was 18·0, in the Large Town Districts it had declined 7·7 and was 17·3, in the Small Town Districts this rate had declined 5·2 and was 15·6, in the Mainland-Rural Districts it had declined 1·3 and was 15·5, while the rate in the Insular-Rural Districts was 2·1 higher at the end of the fifty years than at the commencement, being 13·0 in the first year of registration, and 15·1 in the last.

In the first year of registration the death-rate in the Principal Town Districts was the highest, and was 14·5 more than that in the Insular-Rural Districts, which was the lowest; at the end of the fifty years of registration the death-rate in the Principal Town Districts was still the highest, but was only 2·8 higher than that in the Insular-Rural Districts, which was the lowest. This fact gives some indication of the good results of modern public health measures, for it must be due to them that the death-rates in the urban population has been reduced very nearly to the level of the death-rates of the rural population, and due to them that the risk of death as tested by the death-rate is now in towns only little greater than what it is in the country.

APPENDIX TABLES.

TABLE 1.—Population estimated to the middle of each year; with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1904, and their Proportion to the Population; also the Excess of Births over Deaths, the Illegitimate Births, and their Proportion to the Total Births.

YEAR	Estimated Population.	BIRTHS.		DEATHS.	MARRIAGES.	Excess of Births over Deaths.	Rate per 1000 of Population.			Percent. of Illegit. to Total Births.
		Total.	Illegit.				Births.	Deaths.	Marriages.

N.B.—Districts containing Parliamentary and Royal Burghs are printed in capitals, thus:—EDINBURGH. Districts containing Police Burghs or Towns of 2000 Inhabitants and upwards are printed in small capitals, thus:—CARLUKE.
 An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more, than one Parish. The component parts of these Districts will be found at page 563.
 A dagger "†" is prefixed to those Districts which consist of only a part of the Civil Parish of the same name.

The Table read vertically shows the number of Wives at each age, with the ages of their Husbands at Marriage. Thus, of 2,451 Wives at the age of 20 and under 21 years, four married Husbands aged 17 and under 18 years, nineteen married Husbands aged 18 and under 19 years, one hundred and seven married Husbands aged 19 and under 20 years, etc. Read horizontally the Table shows the number of Husbands at each age, with the ages of their Wives at Marriage. Thus, of 1,129 Husbands aged 20 and under 21 years, six married Wives aged 16 and under 17 years, forty-eight married Wives aged 17 and under 18 years, etc.

* Bridegroom aged 85 years.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES
BY AN ASTERISK (*).

No.	Districts.	Component Parts (Parishes).
2. Orkney.		
13	Birsay	Part of Harray and Birsay.
14	Deerness	Part of St Andrews and Deerness.
18	Harray	Part of Harray and Birsay.
22	North Ronaldshay	Part of Cross and Burness.
25	St Andrews	Part of St Andrews and Deerness.
26	Sanday	Lady, and part of Cross and Burness.
3. Caithness.		
37b	Keiss	Parts of Canisbay and Wick.
5. Ross and Cromarty.		
58	Applecross	(1) Part of Applecross; (2) Remainder of Applecross and part of Gairloch.
59b	Carnoch	Parts of Contin and Urray.
86b	Carloway	Parts of Barvas and Uig.
87	Lochs	Lochs, and part of Uig.
6. Inverness.		
92b	Cannich	Parts of Kilmorack and Kiltarlity.
112	Kilmuir	(1) Part of Kilmuir; (2) Remainder of Kilmuir, and part of Snizort.
8. Elgin.		
185	Elgin	Elgin, and parts of New Spynie and St Andrews-Lhanbryde.
9. Banff.		
152	Enzie	Parts of Bellie and Rathven.
156b	Glenrines	Parts of Aberlour and Mortlach.
167	Seafeld	Parts of Cullen and Rathven.
10. Aberdeen.		
171b	Ardallie	Parts of Cruden, Ellon, Longside, and Old Deer.
210b	Kinninmouth	Parts of Crimond, Longside, Lommay, Old Deer, and Strichen.
217	Logie Coldstone and Cromar	Logie Coldstone, and part of Glenmuick.
222b	Milbren	Parts of Fyvie and Monquhitter.
227b	New Pitaligo	Parts of Aberdeen, New Deer, Strichen, and Tyrie.
231	Peterculter	(1) Parts of Aberdeen and Peterculter; (2) Remainder of Peterculter.
237b	Savoch	Parts of Ellon, New Deer, Old Deer, and Tarves.
249b	Ythan Wells	Parts of Auchterless and Forgue.
11. Kincardine.		
266	Nigg	Nigg, and part of Aberdeen.
12. Forfar.		
282	Dundee	Dundee Combination, and part of Mains and Strathmartine.
294b	Kilry	Parts of Glenisla and Lintathen.
13. Perth.		
324	Aberfeldy	Parts of Dull, Kenmore, and Logierait.
330	Auchtergaven	Parts of Auchtergaven and Logiealmond.
331	Balquhiddel	Balquhiddel, and part of Comrie.
344	Dowally	Part of Dunkeld and Dowally.
349	Dunkeld	Part of Dunkeld and Dowally.
355b	Foss	Parts of Blair-Athol and Dull.
361	Killin	Parts of Kenmore and Killin.
375	Logiealmond	Parts of Logiealmond, Little Dunkeld, and Methven.
379	Meigle	Meigle, and part of Coupar-Angus.
386b	Persie	Parts of Alyth, Blairgowrie, and Kirkmichael.
387	Perth	Perth, and part of Kinnoull.
393b	Stanley	Parts of Auchtergaven, Kinclaven, and Redgorton.
394b	Strathfillan	Part of Killin.
394c	Tenandry	Parts of Blair-Athol and Moulin.
14. Fife.		
402	Anstruther-Easter	Anstruther-Easter, and part of Killyrenny.
417	Craik	Part of Craik and May Island.
423	Dunbog	Dunbog, and part of Fisk.
425	Dunino	Dunino, and part of Craik.
442	Kirkcaldy and Abbotshall	Part of Kirkcaldy and Dysart.
457b	Thornton	Part of Kirkcaldy and Dysart and of Markinch.
17. Stirling.		
458	St Ninians	Parts of St Ninians and Stirling.
490	Stirling	Parts of St Ninians and Stirling.

CONSTITUTION OF THE DISTRICTS—*continued.*

No.	Districts.	Component Parts (Parishes).
18. Dumbarton.		
496	Dumbarton	Dumbarton, and parts of Cardross and Old Kilpatrick.
19. Argyll.		
504	Ardochattan	Part of Ardochattan and Muckairn.
505	Ardnamurchan	(1) Parts of Ardnamurchan and of Arisaig and Moldart.
506	Bailachulish, etc.	Parts of Kilmallie and Ardour.
509	Cumlodden and Minard	Parts of Glassary and Inveraray.
515	Kilbrandon and Kilchattan	Kilbrandon and Kilchattan, and part of Jura.
517	Kilchrenan, etc.	(1) Parts of Kilchrenan and Dalavich, and Glenorchy and Inishail; (2) Remainder of Kilchrenan and Dalavich.
520	Kilmallie	Parts of Kilmallie and Ardour.
525	Lismore	Lismore and Appin, and part of Ardgour.
526	Lochgilthead	Parts of Glassary and South Knapdale.
529	Muckairn	Parts of Ardochattan and Muckairn, and Glenorchy and Inishail.
535	Tarbert	Parts of Kilcalmonell, Saddell and Skipness, and South Knapdale.
536	Bowmore (or Kilarrow)	Part of Kilarrow and Kilmeny.
543	Kilmeny	Part of Kilarrow and Kilmeny.
545	Kinlochspelve	Part of Pennygown and Torosay.
547	Portmahaven	Part of Kilchoman.
548	Salen	Parts of Kilninian and Kilmore, and Pennygown and Torosay.
549	Tobermory	Part of Kilninian and Kilmore.
550	Torosay	Part of Pennygown and Torosay.
20. Bute.		
556	Lochranza	Parts of Kilbride and Kilmory.
21. Renfrew.		
559b	Bridge-of-Weir	Parts of Houston and Killellan, and of Kilbarchan.
572	Neillston	(1) Part of Neillston; (2) Remainder of Neillston, and part of Paisley.
22. Ayr.		
576	Ardrossan	(1) Parts of Ardrossan and West Kilbride; (2) Remainder of Ardrossan.

		Bridgeton, . . . 644	Catrine, . . . 613	Creich (Fife), . 418
		Brodict, . . . 553		

* The actual number of Districts is 1073—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 7 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place compound names in the order in which they are pronounced.

Creich (Sutherland), . . . 46	Dunbarney, . . . 347	Findo-Gask, . . . 352	Graitney (or Gretna), . . . 327	Keiss, . . . 37

GLASGOW:

PRINTED BY JAMES HEDDERWICK & SONS LIMITED.

FOR HIS MAJESTY'S STATIONERY OFFICE.

1. The first part of the paper discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the success of any business or organization. The author argues that without reliable records, it is impossible to make informed decisions or to identify areas for improvement.

2. The second part of the paper focuses on the challenges of record-keeping in a rapidly changing environment. The author notes that new technologies and regulations can make it difficult to keep records up-to-date and accurate. However, the author also points out that these challenges can be overcome with the right tools and processes.

3. The third part of the paper provides a detailed overview of the various methods used to collect and analyze data. The author describes both traditional methods, such as surveys and interviews, and more modern techniques, such as data mining and machine learning. The author also discusses the importance of ensuring the quality and integrity of the data collected.

4. The fourth part of the paper discusses the ethical considerations surrounding data collection and analysis. The author emphasizes that it is crucial to protect the privacy of individuals and to use data responsibly. The author also discusses the importance of transparency in the data collection process and the need to obtain informed consent from participants.

5. The fifth part of the paper discusses the future of data collection and analysis. The author predicts that the use of artificial intelligence and machine learning will continue to grow, and that these technologies will play an increasingly important role in data analysis. The author also discusses the potential for new methods of data collection, such as wearable devices and sensors.

6. The sixth part of the paper discusses the importance of data security. The author notes that as the amount of data collected increases, the risk of data breaches also increases. The author discusses various methods for protecting data, such as encryption and access controls, and emphasizes the need for a comprehensive data security strategy.

7. The seventh part of the paper discusses the importance of data governance. The author notes that data governance is the process of managing the availability, usability, integrity, and security of the data used in an organization. The author discusses various methods for implementing data governance, such as data audits and data quality management.

8. The eighth part of the paper discusses the importance of data literacy. The author notes that as data becomes more prevalent in our lives, it is important for individuals to have the skills and knowledge to understand and use data effectively. The author discusses various methods for promoting data literacy, such as education and training programs.

9. The ninth part of the paper discusses the importance of data ethics. The author notes that data ethics is the study of the moral principles that govern the use of data. The author discusses various methods for promoting data ethics, such as the development of codes of conduct and the establishment of ethics committees.

10. The tenth part of the paper discusses the importance of data transparency. The author notes that data transparency is the process of making data and the methods used to collect and analyze it accessible to the public. The author discusses various methods for promoting data transparency, such as open data initiatives and the use of data visualization tools.
